TO MEMORY OF GALBRAITH

Bronze Tablet is Embedded in Huge Boulder on Spot Where Commander Was Killed.

"Dedicated to the Memory of Frederick W. Galbraith, Jr., National Commander of the American Legion, who was killed on this spot in active service of the American Legion, June 9, 1921," reads the inscription on a bronze tablet embedded in a huge boulder which has been dedicated by the Legion in memory of its beloved commander.

Galbraith Memorial.

Mr. Galbraith was killed in an automobile accident near Indianapolis, while in active service of the Legion. The rock and tablet were recently dedicated at a special service by the headquarters staff and attended by National Commander Harold MacNider and Mrs. Lowell F. Hobart, president of the American Legion Auxiliary.

KID CORPORAL SCORES AGAIN

John Shoemaker, Through Phoenix American Legion, Draws West Point Appointment.

The "Kid Corporal" has scored again. John Shoemaker, who enlisted in the army at fourteen and served many months with the American expeditionary forces in France, has now received presidential appointment to West Point.

Shoemaker recently graduated from a high school in Arizona, where he took special courses in military tactics under Major James MacNider. Major Jones became interested in the lad because he had such an unusual war record.

Shoemaker served with a machine gun company in the Fifty-fourth Infantry for two years, during and following the World War. His West Point appointment followed a campaign in his behalf by the Phoenix American Legion and Major Jones, who were anxious that a war veteran should take the place at the military academy vacated by Charles Barrett an overseas hero, who graduated at the head of his class last June.

POLAND SEEKS LEGION PLAN

Government Asks American Body for Details in Matter of Employment for War Victims.

One of the highest compliments ever given to the patriotic efforts of an organization was paid the American Legion when the Polish government asked that the Legion explain its plan to help the unemployed veterans of the United States in order that such a plan might be used for dealing away with unemployment in Poland.

The Legion furnished a detailed outline of the scheme, used in this country, and has received a letter of thanks from T. Honko, minister of department of the consulate general.

More than 400,000 ex-soldiers were given at least temporary employment during the first week of the Legion's drive and it is estimated that now more than 500,000 men are in permanent positions largely through the efforts of the American Legion.

Ex-Tomnies Cheer the Legion.

Ex-Tomnies who attended the first annual conference of the British Legion in London recently, were impressed and cheered H. Nelson Jackson, national vice commander of the American Legion, when he related the workings of Commander Harold MacNider and the entire American Legion to these "buddies" in the mother country. The message of good will and comradeship was received for the British Legion by Field Marshal Earl Haig.

Many "Bummed" to Convention.

Because of the financial depression and lack of government compensation many penniless disabled veterans of the World War walked and rode in box cars to San Francisco to attend the second annual convention of the Disabled American Veterans of the World War, according to Raymond Creelman and Robert M. Smyth, members of the national staff.

Medals Awarded School Boys.

Two hundred school boys in Pennsylvania public and private schools have been awarded medals of merit for superiority in classroom work and athletic activities by the Pennsylvania American Legion.

Weeks Disapproves Plan.

Because it is retained as a military training area, Secretary of War Weeks disapproved the plan to cut Camp Dix up into small farms which would be given to World War veterans.

NEED FAITH AND CONFIDENCE

Positions Open for Newly Trained Victims of World War, Before They Are Ready.

That the rehabilitated World War veterans' success in life depends absolutely upon his faith in himself, is the assertion of Maj. W. F. Lent, chief of the equipment bureau of the United States veterans' bureau which has in charge the proper training of thousands of disabled service men.

Major Lent, in speaking before the headquarters staff of the American Legion in Indianapolis, said that the Legion and the auxiliary had as one of their greatest obligations the task of instilling into the hearts of service men an absolute faith and confidence in their selves and their abilities to cope with life's problems.

He said that the government is to have a place for every veteran three or four months before the veteran is ready to take it. "We do not guarantee that a man who has studied in a factory, upon completion will be placed in that position," the major explained, "but he will be placed in the path so that he can obtain such position through his own initiative and ability."

"We want employers to understand, too, that these men are no longer cripples. They may be physically crippled, but not industrially or vocationally. When we put a man with one arm into a job, he is as well able, and perhaps more so, than that particular work as is the man with two arms."

AS THE "FLAPPER OF 1776"

Charming Hilda Scheurer Asks Indianapolis Legion in Advertising Benefit Picture Show.

A white wig and a hoop-skirt are not generally considered as part of the attire of a flapper. It is in that particular work as is the man with two arms."

Young Scheurer, an orient worker in the Legion Auxiliary, who she wanted to draw the attention of the public to the fact that the Indianapolis American Legion is presenting a historical motion picture at one of the local show houses.

Miss Hilda Scheurer, charming as a "flapper" of 1922, was still more attractive as a "flapper" of 1776. The crowds which packed one of the largest and finest motion picture theaters in the Middle West during the entire season of 1922, were a picture of Revolutionary days, which the American Legion is sponsoring, was proof of the fact that Miss Scheurer had a "flapper" of 1776.

It was not the first work Miss Scheurer has done for the American Legion. She has been an active worker in the Legion Auxiliary.

War Gases for Farm Pests.

Gases which were used with such deadly effect during the World War are now being used for the extermination of farm insect pests. In the West for the extermination of Jack rabbits and cophers. Mustard gas is sprinkled over the soil and the insects are killed and causing them to rub them across the face. The poison then quickly becomes effective.

Clock for Airplanes.

The air service of the United States War Department has developed a peculiar kind of clock to read on airplanes. It is said the clock will keep perfect time in any temperature from 0 degrees below zero to 150 degrees above. Furthermore, the clock is so simple that it need not affect the accuracy of the timepiece, which has a movement like a watch and is wound by battery.

Carving On With the American Legion

"Standing Bear," a Sioux squaw, presented Mrs. Lowell F. Hobart, national president of the American Legion Auxiliary with an Indian doll during Mrs. Hobart's visit to the Indian reservation in South Dakota.

On a \$10,000 award six American Legionnaires from Dallas, Tex., started for north Texas to help the work in 200 days. One got married on the way and three got by the wayside, only two reached the last lap of the journey.

A hero of the World War, five times wounded at Western Front, but without rest and without rest, was awarded the government compensation to which he was entitled, Dupont Webster of Philadelphia, Pa., committed suicide and would have been buried in a private field had not the American Legion given him a decent burial.

Declaring his claim for disability

was disregarded by the U. S. veterans' bureau. Garland E. Carr, colored veteran, boarded a boat to return to the building in which the Washington (D. C.) bureau is housed, stepped upon the roof and then touched a match to it.

USES FOR STEAM PRESSURE COOKER

Housewife Saved Much Time and Fuel in Cooking, Especially in Hot Climate.

FOODS BECOME MORE TENDER

Cheap, Tough Cuts of Meats or Dried Beans May Be Prepared in Relatively Short Time—Flavors Retained.

In canning meats, chicken, fish and vegetable mixtures, especially in hot and humid climates, the pressure cooker is usually recommended for reliable processing. There are also many dishes which may be prepared for the table in the steam pressure cooker. The United States Department of Agriculture suggests:

Most foods cooked in steam at temperatures above 212 degrees Fahrenheit become tender much more rapidly than in the ordinary way of cooking. Cheap, tough cuts of meat or dried beans and peas, consequently may be prepared in a relatively short time in the steam pressure cooker, since at 5 pounds pressure the temperature of the boiling water and steam within the cooking vessel is 225 degrees Fahrenheit; at 10 pounds pressure it is 240 degrees Fahrenheit; at 15 pounds it is 250 degrees Fahrenheit; and at 20 pounds it is 259 degrees Fahrenheit.

TWO VERY DRESSY GARMENTS

worn day in and day out; the utility suits in which American ladies excel. They have charms of their own—neatness, fine lines, marvelous tailoring. For them English suitings, leather mixtures, pique and other twills and serge are chosen. Their skirts are plain, just wide enough for comfort in walking, and being straight lines. Their coats vary in length, and are occasionally braided-trimmed, but usually plain and have notched lapels, patch pockets, small collars and plain coat sleeves with narrow cuffs.

The dresser suits cannot be disposed of in general terms for they differ greatly. The cloths chosen for them are those with soft and supple texture and velvety surface like divetone or velours. Embroideries, fur trims, buttons and tassels are elements that are skillfully used to elaborate the rich materials and dress them into a variety of styles.

GROUP OF FALL HATS

braided embroidery on the coat and skirt and gray caracul fur in the collar and deep cuffs. The cloths and panels in the coat are mingled ingeniously. Another straight-line coat, in the metal cloth and trim with black velvet at the right, has set in sleeves and is richly embroidered. The collar and sleeve trimmings are of black caracul and the zircon of leather.

New fall hats are making a steady entry—they are creations of consistency. Paris is sending over hats of two extremes as to size—either very wide-brimmed hats or small draped

brims across the face and droops from it at the sides. An unusually graceful hat completes the group, with crown covered with a metal cloth and trim with black velvet. Two rows of silver beads favor attention to its becoming trim lines and sheers of Japanese paradise help to emphasize them.

BOBBED HAIR HAT

A hat designed particularly for the woman with bobbed hair is among the season's novelties. Indeed, it might be termed almost a necessity, since the many ways that it is all so likely to live up to its name when there is no cold hair through which to trust a hatpin.

The bobbed-hair hat is a snugly fitting little affair of satin or tulle, with a contrasting band of trimming around the crown and long, dangling coils of ribbon over each ear.

A Large Type of Steam Pressure Cooker in Common Use.

and the extractives from meats or vegetables can easily be kept and utilized. Some flavors are better retained in the tightly closed cooker. It is a good idea when planning to use the pressure cooker for preparing a meal, to put as many articles as possible into the cooker at once.

HOME CONVENIENCES

One way to get labor-saving devices for the home is to devote all proceeds from poultry grown from one setting of eggs to buying home conveniences, suggests an extension worker, who put this idea into practice in Linn county, Mo. Any woman could follow this plan independently, but in Linn county seven communities organized and 104 women pledged themselves to buy conveniences with the milk made from the flocks raised and sold after setting one hen.

In addition to the 722 chickens, which brought \$735.20 each a number of premiums were offered by business men, ranging all the way from a paring knife to a pressure cooker, for those who managed the best results from their single setting. Several communities who have heard of this plan have asked to come in another year.

How to Cook a Pudding.

Stewed and boiled meats which are cooked in the pressure cooker often have a richer flavor than those cooked over the stove. The problems of cooking meat in the pressure cooker are those incident to finding the proper length of time for which a piece of meat of given size, shape and toughness needs to be cooked. The rate at which the heat penetrates to the center of the piece of meat, and the amount of heat necessary to soften the connective tissues must be considered in connection with the time.

Take Pains in Cooking.

Stuffed meats in cooking and setting the table are the most common errors in the kitchen, says the United States Department of Agriculture. The same rule applies to such foods as soups, broths, beef, mutton, quicker expansion, and reduces the time of cooking. It may be advisable, also, during the first part of the cooking period, to keep the petcock wide open, and even to prop the cover up so that it fits loosely, in order that the rate of cooking shall not be too rapid. When the pudding has risen well the lid may be clamped down and the pressure brought slowly to 15 pounds for 10 or 15 minutes.

Use of Milk Cord.

Mirrors and pictures are most up to date hung with a heavy silk cord and the objectionable odor will then entirely disappear.

ALMOST WRECKED STATES R. R. MAN

Stomach Trouble Had Him Nearly Past Going, Declares Mower.

"Tanlac has helped me to gain ten pounds," said J. E. Mower, 197 Park St., Akron, O., well-known railroad man.

"My stomach was in such bad fix that for several days at a time I could hardly retain my food. I had no appetite and often the very sight of food made me sick. I was intensely nervous, too, could not rest at night, felt tired and worn out all the time, and lost weight and strength until I was almost a wreck."

"Tanlac has made me feel like a different man. My appetite is enormous and I haven't a sign of indigestion left. I never felt stronger. Tanlac certainly does the work."

Tanlac is sold by all good druggists. An advertisement.

Writing works wonders if you keep busy.
