"If I Only Had Health"

How often we hear someone make that remark. People do not appreciate health and really want it more than anything else life offers.

A well person enjoys life infinitely more than a sick person. Anyone suffering with a mild cold in the head knows how he reacts by a slowing up of all his faculties—he actually feels sicker than he is, often he is miserable.

Health, then, can be said to be the one universal want of all people. People will pay any price to regain health. Some people know that health is easy to regain, and easier to keep.

In Chiropractic the method is available. Chiropractic takes nothing from you nor does it add anything to you. It is a scientific method by which you may regain health or keep the health you now have.

Regular adjustments are essential as regular baths. Why don't you begin taking adjustments? There is no charge for consultation and spinal analysis.
