Why Don't You Put Yourself On the Pay Roll?

You pay the landlord, the grocer, the butcher, the coal man, and the electric light company every month. How much is there in it for you? Who are you working for—the landlord, the grocer or yourself?

Next pay day why don't you bring your pay check down to the bank and get it cashed and, first of all, put One Dollar, or more into a savings account. Then try keeping this up each pay day for a while and if, later on, you get a little raise, try to pay the amount of that raise to yourself—add it to your savings account.

The advantage of a savings account is that it earns you 4% interest night and day, and you can always get your money any time you want it.

Many hundreds of people make regular monthly or weekly deposits of a dollar or more in our savings department. They think it is a pretty good scheme. Why don't YOU try it.

"Always In the Lead"

How The Master Driver Became Master Tire Builder

IN 1903, driving the "999" racing car, Barney Oldfield started his career of victories that later earned him the title of "Master Driver of The World." To overcome the tire weaknesses that made racing difficult and dangerous, he studied tires—specified materials—supervised construction.

Today, Barney Oldfield is known as the "Master Tire Builder." Starting with the crude tires which carried the "999" one mile in sixty seconds, Oldfield gradually developed his famous Cords—a set of which covered 500 miles at eighty-eight miles an hour without a change.

In three years Oldfield tires have won every important race on American speedways. They are the only American tires that have ever taken first place in the French Grand Prix. They have won for three consecutive years in the 500-mile Indianapolis Sweepstakes. So far in 1922, Oldfields have lowered four World's Records and seven track records.

The Wichita Test Run gave evidence of Oldfield superiority in touring—when a set of four Cords covered 34,525 miles over rutted, frozen, winter roads—a performance attested by the Mayor of Wichita.

See your dealer and get a set of these rugged tires that Barney Oldfield has developed and perfected through a lifetime of practical tire experience. Their performance will convince you that they are "The Most Trustworthy Tires Built."
