

OPINIONS OF NOTED PHYSICIANS

"The druggish healer is one of the best things that has come into the life of the present."
Chas. D. Mayo, Rochester, Minn.
"it I were a patient in a prehistoric, I certainly would want the mode of treatment that offered any prospect of relief or recovery."

"What a patient wants is results. If the medical doctor cannot give them to him, although he learnedly tells him what is the matter with him, and the irregular can, just so long those methods of treatments are going to have followers, and rightly so."

"When people we can do no good at are at least relieved of suffering at the hands of irregulars, no one can blame them for adopting them, and to my notion any law that would prevent the sufferer from being permitted to receive such relief would be pernicious and certainly not for the good of humanity."

"I am thoroughly believe that progress in the art of healing—not by any means an exact science—is best conceived by giving people the utmost freedom to choose whom they please to treat when they are ill."

"The Chiropractor uses nothing but his bare hands to realign bones that are misplaced in the spine, thus releasing pressure of harder substance from the nerve trunks, to restore normal tension to individual nerve fibres. The application of such adjustments is practically painless and leaves no ill effect with the patient."

"Chiropractors are obtaining results that I could not have obtained with medicine or surgery."

"There are Chiropractors who in certain kinds of cases, I am convinced, do vastly more good than the most highly educated physician."

"Clinical records show that there is hardly a recognized form of disease that cannot successfully be treated by Chiropractic adjustments."

"The Chiropractors are working marvels so wonderful that even members of the medical fraternity are taking notice of their great work."

THE HONOR ROLL
The student body awaited with intense interest the honor roll at the end of two weeks. At the close of the list and all were wondering whether or not that number would be increasing as they had been in such a pleasing ratio, however, for when the marks were in no less than forty-five per cent.

In last Friday's game when the Northern and White composed the Eskimos, the Eskimos were victorious to either win or hold them to a very low score.
Northern's first drive was a touchdown and a field goal. The Eskimos were outplayed the Birmingham eleven. When the final whistle blew the score was 45-0 in favor of Northern.

Bobbed Hair—John Gore
My opinion being that bobbed hair, it seems to me that it depends upon whose bobbed hair it is. There is some bobbed hair that I adore. There is some that is not bobbed that I adore just as much.
