### To keep the home cool in summer and warm in winter, use CELOTEX

It is the correct insulating lumber because it resists heat or cold like a woolen blanket. Reduces your fuel costs one third, gives added strength to a building.

CELOTEX is a great utility lumber. Use it for sheathing, plaster base (to which all standard interior plasters form a perfect bond) or sound deadener.

It is lighter than lumber, though you saw, plane and apply it the same as lumber and is available in suitable sizes for all forms of building construction.
