Toilettes for Afternoon; Reflect Hues of Rainbow

RAINBOW HAT is inclusive, in that it is not confined to a single individual type, but refers to a most lovely color scheme introduced into present-day millinery.

There are three rainbow hats pictured in the group herewith, but alas, printer's ink fails to reveal their ravishing color beauty. For instance, that cunning little top-hat shape down in the group is made of narrow metal ribbon, representing a half dozen pastel shades, so interworked

American Individualism

A Timely Message to the American People

By HERBERT HOOVER, Secretary of Commerce

OUR social and economic system cannot march toward better days unless it is inspired by things of the spirit. It is here that the higher purposes of individualism must find their sustenance.

For centuries, the human race has looked for divine inspiration in a few. The result was a dual faith in religious hierarchies, the Divine Right of Kings. The world has been disillusioned of this belief, that divinity rests in any special group or class.

The vast multiplication of voluntary organizations for altruistic purposes are themselves proof of the ferment of spiritual life, and of the responsibility. These associations for advancement of public welfare, improvement, morals, charity, public opinion, health, the clubs and societies for recreation and intellectual advancement, represent something moving at a far greater depth than "joining."

Not only are there a great many writers of real poetry, and still more writers of near poetry, but there must be an enormous number of readers who do not turn over the page hastily when they see a poem in a magazine...

PROLONGED USE OF CONCRETE

The growth of the Portland cement industry in this country is one of the marvels of our industrial development.

In 1924, we are told, only 80,000 barrels of cement were produced in the United States. One hundred years later we are achieving an annual production of 1,000,000 barrels.

The growth of the Portland cement industry in this country is one of the marvels of our industrial development. It has led to the construction of public buildings, skyscrapers, bridges, public elevators, dams, highways, public highways and other structures in which strength and durability must be combined.
