The Truth About Gasoline Prices

THE Standard Oil Company (Indiana) has announced an immediate reduction in the price of gasoline of 6.6c per gallon applicable throughout the entire territory in which it does business.

It asserts that the retail prices thus made are below the cost of production and distribution.

The Governor of the State of South Dakota, buying distress gasoline below cost of production, and charging against the State no adequate cost of distribution, is selling gasoline to the public in the State of South Dakota at 16c per gallon.

The Standard Oil Company (Indiana), operating on its established policy that the customers who purchase its goods should never be compelled to pay a higher price than that fixed and maintained by any competitor, quality and service being duly considered, has met this price.

Other State Executives and Officers of municipalities, with entire propriety, have suggested that any prices made in South Dakota be made applicable in their States. Competitors in other states and communities over the territory, also buying distress gasoline below cost of production, have also cut the prices hitherto established and maintained, in substantial amounts.

In establishing the above price, the Standard Oil Company (Indiana) is not endeavoring to injure any of its competitors in any way.

It deprecates the stand taken by some of its competitors that the Standard Oil Company (Indiana) is endeavoring, by reason of meeting these cuts in price and these demands for lower prices, to put its competitors out of business.

The Standard Oil Company (Indiana) does not wish to put any competitor out of business because it feels that competitors are necessary to the successful conduct of its business. It will welcome a change of attitude on the part of all parties concerned resulting in a reasonable price for gasoline which will enable not only it but all of its competitors to enjoy a reasonable profit.

It recognizes that the majority of its competitors are fine business men, entitled to the fairest treatment both by the public and by this Company.

The present situation is an exact parallel to one where the butcher, the grocer, the druggist, the dry goods and shoe merchants and every other retailer would be forced to sell at less than the wares cost.

How long would it last? What would a condition like this do to all of us—if it persisted and spread?

We want no monopoly—seek none. We want your trade—but only on the basis of quality and service—not as the result of impossible prices.

We want competition—you want us to have it. It makes the scales of business balance.

These are not idle words. They mean just what they say.
