PLEA FOR WELL-KEPT ROADS. Neglected Streets Not Alone Unhealthy, but Create Bad Impression on the Visitor. There are 15,450 "incorporated places" in America. Of these 15,450 cities, towns and villages only 2,800 exceed a population of 2,500 people each; yet these 2,800 "urban places" contain 54,000,000 people, while 12,000 "rural places" contain 6,000,000. Nearly all the 8,000,000 residents of the 12,000 "rural places" live on unpaved streets, and the same holds true of a large percentage of the residents of "suburban places." There are no statistics to show how many miles of streets there are in the 15,450 "incorporated places," so that we cannot estimate accurately the percentage of unpaved streets. Even without such statistics to indicate the extent of unpaved streets, it would be evident enough to any one who travels much that most of our small towns are inadequately paved. Mud half the year and dust the other half are characteristics of their streets. When we grow steadily elated over our progress in paving our highways such facts as these should bring us to earth—yes, literally to earth—to the dirt streets that are typical of most of our small towns and villages and also of many of our larger cities. A Want Ad Does Much.
