

CLUTCH FEATURED IN DODGE CHANGE

There is one improvement in Dodge Brothers motor cars which prospects pass over without much comment when it is being explained to them, but which they all speak of with real enthusiasm after they have driven the car, according to C. R. Evans, of the Evans-Jackson Motor Co., local Dodge distributor.

Closed Cars Now Have Good Sale

"Just as the tang of autumn coolness stirs the blood, so the cool weather of September will stimulate anew the purchase of automobiles—and particularly enclosed automobiles at a moderate price," declares Boughner Bros., distributors in territories for Hudson and Essex territory. "We have had a slumpless summer, and now we have prospects of an autumn which will close 1923 with such a demand as we never before have experienced."

FORD INTRODUCES DEMAND BIG FOR NEW BODY LINES NASH CARRIOLE

Introduction of a higher radiator, bringing new and improved body lines to all types of Ford cars has been announced by the Ford Motor Company. The changes have just gone into effect and the various types are now in production. While the larger radiator has been made standard on all types and which it has made possible other better features in body design, there is no radical departure in construction.

REAL JOYS OF LIVING IN COUNTRY

When the sun begins to set, the days spent in your motor car, there is the time to pick up the dust and finally, and sleep away in some quiet country place for a few days to taste the real joys of living. Here is a genuine spirit of ease and they will seem to be enjoying themselves while on their lazing program.

It has been the enclosed car at a moderate price which has made it possible. The Hudson-Exess organization has a product which has achieved a unique position in the market. The models for 1924 have been announced by several leading lines, and a competitive market with Hudson and Essex coaches. The Hudson-Exess organization thus retains practically an exclusive product.

HARDEST USE GIVEN TIRES IN SUMMER

Inspection Necessary Before Tires Are Started. Not only during the warm months is the average passenger car driven at least twice as far daily as in the winter season, but it usually is driven very much faster. For these reasons tires are subjected to more severe service, and troubles with them come very much closer together in hot weather during this period of heavy driving, which calls for a careful inspection and revision of the equipment before long distance trips and vacations are made.

Buick Car Is Much In Demand, Says Dealer

That the Buick car is much demanded by the public was shown this week when James E. Valentine, local Buick distributor, sold a Buick sedan to Russell H. Buisson of 200 Oakland avenue. "A few weeks ago I sold a car to 'Billy' McHedrick," related Mr. Valentine, "but he canceled the order when he found that he could not get delivery until in September, as he wants to leave on a trip this week. As soon as it leaked out that the order was cancelled, Mr. Baldwin immediately got in touch with me and asked to buy 'Billy's' sedan."

Lubrication of Chassis Is Too Often Neglected.

The modern motorist by this time has become, as a rule, well educated in the care of his car, save in the single respect of attending to the lubrication of the chassis. The average motorist has learned, perhaps, by the experience of paying \$40 or \$50 for a new battery, that it pays to attend regularly to its filling and testing. He has learned, perhaps, through paying for new bearings for his motor that it pays to keep plenty of oil in his crank case.

Odorous Exhaust.

When the carburetor is working perfectly, the exhaust gas is colorless and almost entirely odorless.
