AN OPEN MIND.

There are people who counsel others to avoid "trite" sayings, and then prove their own originality by extolling the virtue of "an open mind".

Obviously there are many "ball headed" individuals in this world of paradoxes. It is certain that when a man holds tenaciously to an opinion in the face of an opposing majority he is either firm or obstinate—but which? He may be blind or he may see farther than the multitude.

Our racial weakness is in believing too implicitly in the correctness of majorities. We forget that there are few great teachers and that the tiny minority of today is likely to become the great majority tomorrow.

An always open mind is as much a mistake as an always open door or mouth. It would be better to say "an intelligent mind" which can control the thoughts that enter or leave it.
