Number of Owners Participating in Campaign Passes . 10,000 Mark.

10,000 Mark.

Frepared by the Union States Dejactament Progress in Astronautorian Control of the Control of the

during the period totaled more than 110,000.

Government officials who have been in close touch with the movement since its beginning three and one-haft years ago are much gratified with the hatest tresulfs. The continued interest being shown in the camping introductual the country shows the permanent nature of the popularity of the purebred sire, and points to greater possibilities in the future. The list of persons who are using purebred afres exclusively, a predefer have predefer and policy of are using purebred afres exclusively, and points to greater be accountry on a purebred-sire basic on an average of the predefer have placed more than 1,200—1000 head of tive stock and poultry on a purebred-sire basis. On an average 35 per cent of the female animals and a 90 per cent of the female poultry, kept by these persons, are also purebred, if Each year that purebred sires are saed by these breeders, therefore, greatly littereases the total number of pure bred animals in the country.

Standing of States Changes.

Standing of States Changes.

During the three-monthy period, Vermont and West Virginia showed the greatest number of enrollments, causing some changes in the relative standing of the states active in the work. Vermont, which previously good seventh in the list (and six months ago tenth) is now afth; while West Virginia, where all in states, advancing from seventewith to eighth place. West Virginia, where legislation outdawing scrub-sires became effective January I, enrolled more than three times as many persons during the quarter some of the previous planters.
