YOU SIMPLY CANNOT BEAT EXCESS

Excess is always destructive, overeating, overexertion, underdevelopment, starvation—each is an excess beyond the health line. There are besides the healthy persons, two distinct groups of people in this world: those who are over-vital and those who are suffering with a lack of vitality. Both groups are paying the penalty of excess. The over-vital person may exercise a great deal to work off his excess. The other may begin taking tonic to regain his vitality.

Excess at hazards. The overly vital person will find relief in Chiropactic. The person suffering from disease, which is a form of under-development will find just what he wants in Chiropactic. Chiropactic is not an excess method of relieving pain. It is fundamentally sound and proven right. Take adjustments.

REMEMBER "CLEANUP DAY" Folks, remember next Tuesday, May 8, is Birmingham's official day to clean up.

Get out your winter's collection of bottles, cans and similar small refuse and place them in suitable receptacles at your curb line. Manager Starr says the return calls will be made to homes of those who do not have their stuff out in time for collection. Horses Have Musical Ears. The musical earliness of horses is demonstrated by the rapidity with which cavalry horses learn the significance of bug-calls.
