Why A Store Should Be Well Lighted

ALL PEOPLE are attracted by bright, skillfully arranged lights. It has been shown by actual experiment that from 30 per cent to 50 per cent more people stop to inspect the display in a thoroughly well-lighted show window than are halted by the half-lighted and discouraging appearance of many store windows.

Other tests have demonstrated that business increases fast after an indifferently lighted interior has given place to one in which modern illumination methods are used. Buyers almost invariably will choose a brightly-lighted store in preference to one in which good lighting is neglected.

Competition in trade is best met by high grade lighting. Talk with us on this subject.
