**BUREAU OF EDUCATION
ISSUES INFORMATION
BULLETIN FOR TEACHERS**

Publications and other materials of
all Federal Departments useful to
teachers are listed for the first time
in a bulletin just issued by the Bu-
reau of Education of the Department
of the Interior.
The materials listed include bullet-
tins, leaflets, circulars, periodicals,
maps, charts, mounted exhibits, mod-
els, stereopticon slides, and moving
picture films. This listing by sources
of the wealth of material readily
available through the Federal Govern-
ment Departments will be very
helpful to the educational world as
few know the nature of the avail-
able material or the method of ob-
taining it. The bulletin is freely il-
lustrated, reproducing types of the
material available. Persons desiring
the bulletin should address the Com-
missioner of Education, Department
of the Interior, Washington, D. C.,
asking for Bulletin 1924, No. 23.

Seed Germination

Tales are often told of seeds that
have germinated after centuries. Most
seedsmen accept such stories with re-
serve, the number of instances in
which this has actually happened be-
ing very small. Not many seeds retain
life after ten or twelve years. Onion
and parsnip seed will not, as a rule,
last longer than twelve months. Let-
tuce seed sold in the shops is always
two years old, the first year's seeds be-
ing unfit for sowing.

"Kansas" and "Arkansas"

There seems to be no connection be-
tween the words "Kansas" and "Ar-
kansas," although both words are de-
rived from the names of Indian tribes.
"Kansas" is from the name of a tribe
who called themselves "Kanze." The
word is said to refer to the wind. "Ar-
kansas" was the name of a tribe of
Indians found within the borders of
the state by the first settlers.

Byzantine Glory

The Byzantine period is an era from
330 to 1453. On the death of Theodo-
sius the Roman empire was divided,
and his son Arcadius took the eastern
half with Byzantium as his capital.
This ancient city occupied the most
easterly hill of the modern city of
Constantinople.

Oldest Butterfly Collection

The oldest classified collection of
butterflies and insects in the world,
that possessed by the Museum of Na-
tural History in London. A recent ex-
amination of the collection shows that,
though more than 150 years old, the
fragile exhibits are perfect.

Benefits of Frugality

If frugality were established in the
state, if our expenses were laid out
rather in the necessities than the su-
perfluous of life, there might be fewer
wants, and even fewer pleasures, but
infinitely more happiness.—Goldsmith.

They Must Have Water

Small and delicate shrimp cannot
live out of the water, says Nature
Magazine. If they should be thrown
on the beach by some playful wave,
the next flood tide will find them dead.

Silly to Live on Hope

He seldom lives frugally who lives
by chance. Hope is always liberal, and
they that trust her promise make little
scruple of revelling today on the profits
of tomorrow.—Johnson.

Birds Save Flowers

When opening blossoms are exposed
to the ravages of insect pests, says
Nature Magazine, vireos, warblers and
other insect-eating birds appear to pro-
tect them.
