Ford Production Goes To 1000 Daily
Ford production has been increased to 7,000 cars and trucks a day, it was stated at the Ford Motor Co. today.

to 7,000 cars and trucks a day, it was stated at the Ford Motor Co. today. The company has been operating on an all-out basis since the Ford plant in all its manufacturing plants...

Packard Engineer Lauds 4-Wheel Brakes

By Col. J. C. Vincent
Vice President of Engineering, Packard Motor Car Company
After nearly two years' general use of the four-wheel brake system, things that were predicted occurred...

Brakes on front wheels had been in use in Europe for a very considerable time and it is not surprising that many valuable lessons for the American engineer. However, for years engineers here had looked at work on four-wheel brakes before the war and in 1919 we had developed our system of brakes almost to their present point.

Our own experience has proven also that best results are obtained by the use of internal expanding brakes on the front wheels and external contracting bands on the rear wheels.

With the latest retail sales for a single week in the history of the year ever recorded in Maxwell-Chrysler history, officials of the company are convinced that their two products are well started on the way to a banner year.

BUICK Manager Urges Early Auto Purchase

By E. T. Strong
General Sales Manager, Buick Motor Company
It is a generally known fact that Buick leadership in the automobile industry dates from the inception of the car itself.

In view of the tremendous popularity that has established this leadership so firmly it is not more than natural that at times the tremendous demand for cars is greater than even Buick's immediate production can meet.

This demand for cars on the part of the public is the thing that stimulates the Buick factory to produce more than the quantity of Buicks that shall be built and the body styles that shall predominate.

Of course Buick does everything possible to anticipate the demand but it must be remembered that this is hard to do when cars are wanted in such quantities for the entire country and this extra demand develops over night.

Our own experience has proven also that best results are obtained by the use of internal expanding brakes on the front wheels and external contracting bands on the rear wheels.

With the latest retail sales for a single week in the history of the year ever recorded in Maxwell-Chrysler history, officials of the company are convinced that their two products are well started on the way to a banner year.

STATE OF MICHIGAN

In the Circuit Court for the County of Oakland, to Charles W. Hester, Plaintiff, vs. Rufus T. Foy, Defendant.

In this case I am satisfiedly convinced that the Court now here that the defendant, Rufus T. Foy, is not entitled to a writ of habeas corpus...

Advanced Cereals Discovered

Cereals on cereals recently discovered in the Libyan desert of Africa indicate that the Eskimos and South African bushmen met in Europe 50,000 years ago.

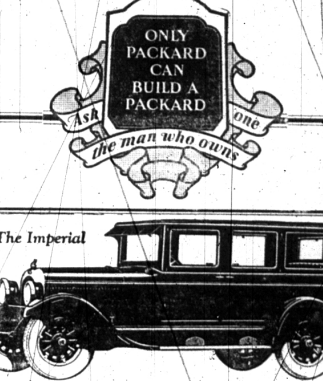

Extreme in Pointed Shoes

In the film of Edward G. R. Eastland, 1917-1922, the dandies wear shoes whose pointed toes were so long that they had to be carried in and tacked to the knees with ribbons or stipes.

PACKARD Fulfills Long Life Expectations

Six months ago Packard began asking all buyers of Packards everywhere how long they expected to keep their new cars. The record shows that 90% intend to keep their Packards three years or more, 75% four years or more, and 60% five years or more.

Evans-Jackson Motor Co.
For example, in Willow-Barre, Pa., a town of 77,000 population, 215 Packard Six cars were bought during the past five years and 212 are still in service there.

A Score of New Results Emphasize The Difference

If a year ago the Chrysler Six had been merely another new car, its first-year production of over 32,000 cars—the largest ever recorded—would not have been required.

The difference of Chrysler engineering is emphasized by the fact that its 3-inch motor develops 68 horse-power, a speed of more than 70 miles an hour and 20 miles to the gallon of gasoline.

Everything that Chrysler advanced design means in the operation, comfort and high quality of a motor car will be made clear in a half-hour's driving. We are eager to prove that Chrysler is the best built car you ever drove.
