Shellac. Lac is a resinous substance exuded from an East Indian scale insect. It consists of a granular substance forming the body of a colony of the insect and containing the principal food of the young.

Taking Stains From Carpets. To remove a stain from a carpet, first blot up the excess liquid. Then mix three parts of water to one part of ammonia and apply to the spot with a stick and rub gently. If the stain is not removed by rubbing, rub with a dry blot, sharp vinegar.

Linen and Cotton. An easy way to tell whether a piece of material is flax or cotton is to set one of the threads on fire. If it is cotton it will flame up and continue to burn. If it is flax it will smolder. Another and even simpler way is to wet the finger in the mouth and place it under the cloth. If the moisture comes quickly through, the cloth is linen.
