I'll tell you why "Overcoating" gives personal satisfaction

I like my house because it's attractive. My friends admire it, and tell me so. And I see passersby stop now and then, to look at it.

I don't have to "protect" and repair my house. I like that.

My house is easily heated. My fuel bills are low. And I like that, too. In summer, when the torrid heat makes the gentlest breeze eagerly welcome, my house is cool and comfortable.

I like my house because my folks like it.

It's my home . . .

. . . and my home is "overcoated." It's covered with "P-Two-Fourteen" Steel Fabric Reinforced Stucco.

I want you to like your home, Drop in, or phone, today, for the Bulletin "Pll Tell You Why."

Lift Your Home Above the Ordinary

"OVERCOATING" is sim-plycovering a building with beau-tiful, permanent, weather-proof, firesafe, inexpensive exterior walls of man-made stone; namely Reinforced Stucco.

More than 30,000 homes already have been lifted above the ordinary by using "P-Two-Four-teem" Steel Fabric as the base and reinforcement for Stucco.

Don't forget that reinforced Stucco "Overcosts" are equally god for cottages, garages, aparticle, duplexes, churches, halls, hotels, and all other aged and weather-worn buildings.

Sweep No More

The broom was one of the first things invented; and to-day it is practically the same as in the days of Eye, Down through the centuries it has wearied women and scattered its dust and germs everywhere.

The broom in fact is not only extremely old-fashioned, but insanitary as well; and its use is a hard and needless

In the modern home its place is taken by the electric va-cuum cleaner, which a child can handle, and which picks up every particle of dust and sucks it into a bag for safe and proper disposal.

Sweep No More.
