Chevrolet Used As 'Trouble Shooter'

The novel combination of a covered wagon and a Chevrolet roadster mounted in front on skis and in the rear on snowmobile caterpillar tractors, is the strange-appearing vehicle used by the Black River Telephone company of Lowville, N. Y., for winter "trouble-shooting" on its lines in the heavy snow belt of New York State.

The difficult winter territory for the company's linemen extends from Lake Ontario to Raquette Lake in the Adirondack Mountains and involves the maintenance of service throughout a chain of 20 exchanges.

This type of vehicle, which will travel over the most formidable snow drifts, was assembled by H. O. Feebles, a mechanic in the employ of the telephone company.

No Winter Increase For Tire Pressure

"During the past two weeks we have had many questions asked us about winter tire pressures," said F. E. Sternal, Goodyear dealer and service station owner. "The answer is that there should be no difference in the amount of air carried in balloon tires winter or summer.

"Many people believe that in summer their tires should have less air than in winter due to expansion, but this is a mistaken idea. While there is some tendency to additional expansion in summer, it is not at all important, for the tires are built to take care of the slight increase.

"So we are telling our customers to carry the same amount of pressure the year around, and to have their tires, wheels and rims inspected before entering upon the winter season.

"When the tire is removed we give careful attention to the flaps for flaps too long or too short cause tube troubles sooner or later.

"The rims themselves should be inspected, cleaned and painted before winter comes on. Rusty rims bring on more tire grief than most drivers imagine.

"A little precaution now will avoid difficulties later, and no driver cares to change tires on the road with the thermometer at a low level and wintry winds blowing."

1926 Again Chevrolet's Greatest Year

In 1925 Chevrolet astonished the automotive world by attaining an annual production never before reached by any manufacturer of gearshift automobiles.

Yet, so spectacular has been the increase in demand for Chevrolet cars, that a new and even more brilliant record is the climax for 1926.

Thus, for two years in succession, Chevrolet has broken all its previous records and has set a new mark in automotive history.

This splendid achievement results from a steadfast adherence to the fundamental Chevrolet policy of building a car of the finest possible quality to sell at a low price.

That the vast majority of buyers now demand a car of this type—and that Chevrolet has been successful in building such a car—possessing the highest degree of smooth performance, smart appearance, and economical operation—is proved by Chevrolet's success during the year now drawing to a close. Come in and see this record-breaking car.
