# Vast Expansion and Advanced Equipment make New Prices Possible

The history of Dodge Brothers drastic price reductions is simple and brief.

A better and better product followed by greater and greater demand.

To meet that demand, an expansion of buildings and equipment involving an expenditure of more than \$10,000,000.

Output vastly increased, with consequent reduction in the cost of materials and production.

Installation of advanced labor-saving and quality-increasing equipment. For instance, one giant steel-body press costing \$10,000 replaces ten former presses costing \$7,500 each, and does the work more efficiently.

Result: The finest line of vehicles in Dodge Brothers history at prices that seem incredible in view of Dodge Brothers traditional quality—

That seems more incredible still when considered in connection with improvements that include—

- Rich and attractive new colors.
- Smart and stylish new body lines.
- Four dependable cylinders.
- Absolute smoothness of engine operation.
- Greater power, snap and elasticity.

And advanced steel body and windshield construction that afford exceptional driving vision at a time when clear vision and safety are paramount in the mind of every motorist.
