Building Up Markets

HE constituent lines of the Michigan Railroad Association will expend THE constituent lines of the Michigan Railroad Association will especially \$25,000,000 this year for additions and betterments to the respective properties. These outlays will provide for greater safe-guards to human life, more comfort for the traveling public, increased facilities and better freight service.

Michigan Railroads may justly claim more than their modest slogan— We Serve Michigan. They have contributed to the upbuilding of the industries of the Commonwealth, as perhaps no other group of rail lines in America has done. Two decades of tremendous industrial expansion justified this far-sighted policy of the railroads.

In encouraging industrial up-building, the railroads have also, in a measure, created a Home Market that absorbs the bulk of the products of our farms, orchards, gardens, etc., right at home. So true is this that with increased production, the railroads are annually hauling farm commodities less and less. All of these—except the hay crop—are consumed at home.

THIS tremendous Home Market is the ideal market. But the expansion policy means more. It has created an outlet for similar products grown in other states. The track market at Detroit, for instance, handles 40 different perishable commodities from the cars direct to the dealers—a single transfer only. To illustrate: Fresh tomatoes are found at the green grocers for seven months in the year, thanks to expedited service and the states before the Michigan crop has matured. This is so for the entire list of fruits and vegetables.

With our present railroad system the average wage earner of today enjoys a far wider range of delicacies on his table the year round than did the Kings and Nobles of Europe of a century or more ago.

THE Michigan Railroad Association, then, takes justifiable pride in announcing its program of improvements and betterments for the current year which will further aid the state's industrial advancement, give even greater importance to the Home Market, and contribute still more towards raising the standard of living of all the people.
