

### Nation Must Use Its Intelligence For Next Generation, Says Little

Urging consideration for the coming generation in his talk Friday night at the First Methodist Church, Dr. Clarence Cook Little, president of the University of Michigan, declared this is a quality more of our ancestors had. By shifting intelligence, interest and ideals to fit the needs of those who are to follow, the world will be a better one in which to live, he told the better one in which to live, he told the 700 persons who crowded into the parlors of the building to observe the thirty-sixth annual College Day banquet held under the auspices of the Epworth League of the church.

Dr. Little declared no nation has ever centered its attention upon the proper rearing of its children and said that unless we pay more attention to this necessity we will have all the faults of those who have gone before.

Education is the keynote of happiness, in the opinion of the doctor who declared that if the spirit of unselfishness which will become contagious.

**A New Christianity**

"I have talked with thousands of young people about religion. These boys and girls are fine, clean, noble Christians and they want a different type of Christianity from that in which you and I have been brought up.

"Only a fraction have been intrigued by present day denominational Christianity. If others are to be so uplifted, we must make the approach more human and full of the thought of love and less of that of authority and fear. That is a task.

"These boys and girls want to come to Christianity through love. They do not want to be made to believe we are about to see a great reformation and change of attitude toward them. We will never be able to legislate virtue and we will never legislate religion through fear.

**Several Varies**

Dr. Little gave an interesting description of his view of present day educational methods. He likened the college students mind to a sack carried on the student's back and into which he places every bit of information received. At regular intervals an examination is made and the sack is dumped out the contents of the sack and selects therefrom as much of the contents as he can hold out and find. His markings depend on how much he is able to grab.

**Several Varies**

Dr. Little said there were two kinds of professors, one who won his way into the hearts of his students and the other who was such a student himself that he was bored with trying to instill his ideas into those of lesser mental capacity. He urged using one type of professor with freshmen and sophomores and the other with advanced students.

The speaker revealed the manner in which he made first year men in college feel at home by inviting them to college a week before the opening day, dividing them into groups where they could not help getting acquainted and assisting them in many ways to learn the things that they ought to know in connection with the beginning of college life.

He said he did that very successfully in the smaller college in Maine where he was formerly president and he expected to work out the same plan at Ann Arbor next fall.

**Natural Elimination**

The president of the University of Michigan favors a dividing line between the Junior and Senior college. He would make a stopping place at the end of the sophomore year in order that students who have become careless may leave at that time without being "fired." He declared that being fired from college was a serious thing to a young person and destroys his or her effectiveness for a long time.

When you consider that 33,000 out of every 100,000 who go to college never get past the first year he said it was a serious problem. With his plan for the early reception of freshmen he expects to over-

come part of this difficulty, and by providing a natural place at the end of the second college year, for those students to stop who are not fitted for further training, he would take away much of the anxiety which he finds in present educational methods.

**His Philosophy**

In outlining his philosophy of education Dr. Little said, "Don't permit yourself to become satisfied. Be completely dissatisfied with existing conditions and search for new opportunities. Learn to recognize opportunities when you find them. Sometimes they come as gently as a mother's kiss. Learn to evaluate an opportunity when it comes and then use it. Don't wait around for someone else to do it."

"The State of Michigan in an educational way has the leadership of most of the United States. We want to keep that leadership. We want to create opportunities for others by organizing the resources of the state in the most intelligent and forward looking way.

"We want to lead to youth the most wonderful and the most happy education. This aim and object lights up a job like mine. When you realize that if you worked for 50 years for 24 hours a day you couldn't get to the height of your idealism, then your job becomes worth while."

**Garden Hints**

By R. W. Eagis

There is a great deal printed about snail spots these days, and its probable effect on our climate and our raising. As usual, there is the possibility of a long cold winter ahead, but we shall not say so to its probability. While we are thinking about snail spots, let us see what we can do for the plants to make them snug for the winter.

If the plants have just been planted, they ought to have a mulch to insulate them from irregularities in temperature. This applies especially to perennials and evergreens. The mulch should not be placed a depth of six inches—seven or eight inches is best, but if not available, straw or leaves will do. Manure is rather risky for mulching perennials or evergreens, as it is likely to burn them, but it is safe to use in general usage for trees and shrubs.

Roses, such as winter roses and hybrid perpetuals can be carried over by hilling up the soil about the plants to a height of 6 or 8 inches, then covering the plants with a covering of straw or leaves to a depth of two or four inches.

Rhododendrons should be banked with leaves. On exposed sites it is often necessary to place a covering of straw or leaves around the plants to prevent snow scalding.

Evergreens should be mulched as above, but newly planted ones should have a good soaking before freezing weather set in. If rain has been scarce.

With all this done, we know that the plants are as snug as we can make them.

The bark of apples of all species, wild and cultivated, and the bark of a number of ornamental shrubs, is a favorite food of mice and rabbits. There are a number of ways in which to ward off these pests.

To prevent mice and rats from gnawing trees in winter—in orchards that tall grass, corn husks, or dry materials, do not gather about the trees in fall. The thin strips of wood, such as shingles, about the tree. Common window screen placed about the tree is effective and safe. Remove in spring as it is likely to attract borers. A collar of tar paper about three feet high, or a coating of coal-tar-cresote mixture on the bark, is a good preventative for both mice and rabbits. Remove the tar paper when the warm weather comes.

An effective way to keep rabbits from gnawing trees is made as follows: Use 1 peck lime and slack in soft water to make a wash the consistency of house paint. Add, when hot, 1/2 gallon crude carbolic acid, 1/2 gallon gas tar, and 4 lbs. of sulphur. Stir well and then apply to trees.

**WAR'S INFLUENCE ON GOAL MARKET SEEN**

Parks Discusses Price Boost On Soft Coal That Recent Struck The United States

"Ordinarily the labor troubles of foreign countries do not concern us to any extent. But when all of a sudden the market of some household commodity undergoes a radical change upwards because of labor troubles in the far side of the Atlantic it becomes of interest," said Charles Parks of the Parks Coal Company.

"The English coal miners have been out on strike for the past six months and England normally supplies the export coal to such European nations as have no supplies of their own.

"When she failed to supply, Germany as next available economical source, filled up the gap caused by England's failure and still this country was affected only to slight degree.

"Germany's reserves of coal during the summer were reduced from eleven million to two million tons when the further export of coal till such time as her reserves should be built up.

"Immediately buying—orders by cable came to this country to such an extent that the production was sold for the next six weeks.

"The market of West Virginia and Eastern Kentucky soft coal was forced up—as much as \$3.00 a ton in one week.

"This is a serious situation and demonstrates that wars are expensive to the non-combatants as well as the principals."

# You KNOW

## What Any Service Job Will Cost You

When you bring your Ford car to us for service and repairs, you know in advance exactly what the job will cost. We have standardized labor charges for every job—based on extensive time studies made by the Ford Motor Company.

For instance, we will grind the valves and clean the carbon for \$3.75. A complete overhaul of the carburetor costs \$1.50. Other jobs are priced proportionately low.

It will pay you to form the habit of bringing your car to us regularly for inspection and servicing.

**STATE OF MICHIGAN** — In the Circuit Court for the County of Oakland, In Chancery.

Adelle Stry, Plaintiff, vs. Elijah Willis, Melissa Willis, Rachael Willis, William Willis, Mary Willis, Robert Earl Willis, Sarah M. Lee, Emily M. Lee, Mary Hank, Eliza Dalton, Sarah E. Willis, Francis M. Willis, Frances M. Willotta, Orville W. Willis, Charles J. Willis, Charles G. Willis, Charles J. Willis, Wellington Willis and Mary J. Willis, Defendants.

At a session of said Court held at the Court House in the City of Pontiac, County of Oakland, State of Michigan, on the 14th day of October, D. 1926.

Present: Hon. Glenn C. Gillespie, Circuit Judge.

On reading and filing the Bill of Complaint, filed in said cause, and the affidavit of Glenn McGee, from which it satisfactorily appears to the Court that the defendants above named, or their unknown heirs, assigns, and assigns are necessary and proper parties in the above titled cause and:

It further appearing that after diligent search no other persons claiming an estate in the premises named in said Bill of Complaint, or any of them, are living and of whom the right title, interest, or whether the right title, interest, or whether they have personal representatives or assigns, or any of them, assigned to any of them, or their personal representatives or assigns, or any of them, have been ascertained, nor can the names of the persons who are included as defendants in said Bill of Complaint be ascertained after diligent search and:

On motion of Petton and McGee, attorneys for the plaintiff:

It is Ordered that the appearance of each and all of the foregoing defendants be entered in this cause within three months from the date of this Order and in case of their appearance, or the appearance of any of them, that they cause to be answered to the Bill of Complaint to be filed and a copy served upon the attorney for the plaintiff within fifteen days after service upon them or their attorneys, or in default thereof, that said Bill be taken as confessed by the said defendants, who shall fail to comply with the requirements of this Order.

It is Further Ordered that the said plaintiff cause this Order to be published within forty days in the Birmingham Eclectic, a newspaper which is published and circulated in said County, once in each week for six weeks in succession, or that plaintiff cause a copy of this Order to be personally served upon each of said defendants, hereinafter named, twenty days before the time prescribed by the Court for their appearance.

Glenn C. Gillespie, Circuit Judge.

# growth!

The growing public preference for Graham Brothers Trucks is strikingly told in the figures—

Year	Truck Sales	Gain
1921	1086	
1922	3401	213%
1923	6971	105%
1924	10791	55%
1925	24056	123%

The first nine months of 1926, with sales aggregating 29,336 trucks, show an increase of 78.4% over the corresponding period of 1925.

Progress—sound, swift, impressive.

Graham Brothers Trucks, with Dodge Brothers 3/4-Ton Commercial Cars, meet 91% of all hauling requirements.
