**Opinions
NEVER UTTERED**

Changes from the trail of an
eccentric and somewhat loose stream
and in no way connected with the
person mentioned are professed.

Chief of Police James Anderson:
"I suppose there is little use guess-
ing as to many things, for instance,
the amount of snow that will fall
here this winter (You see there is a
connection between fall and winter
in this case). However, if anyone is
interested in a guess, which is a lit-
tle more than a guess because I have
done some figuring on it, I should
say there will be quite a bit of snow
in the winter fall."

Ralph Mouthrop, lumber dealer:
"The great, wide outdoor forests in
the winter are beautiful. They are
beautiful in the spring, summer and
fall, too. But please do not forget
that they are beautiful in the win-
ter. Snow has something to do with
this, I find."

William G. Olson, fire chief:
"Spontaneous combustion has been
known to cause fires and, like neg-
lect, is something to be done away
with. There should be, I believe, or
if not believe, then favor, (To the
Editor: You may use either word, I
do not care. W. O.) (To the reader:
You may use either word. I do not
care. Editor) a law against all spon-
taneous combustion. It ruins. All
institutions that ruin should be leg-
islated against."

Little Red Riding Hood: "I want
it clearly understood that broad-
casting stations using my name in
their inane bedtime stories are doing
so without my permission. They must
think I'm an awful goof. I wish
they'd be themselves."

POWER
As Smooth As Electricity

To insure constant flow of smooth power,
Hupmobile machines its cylinder heads to
precise ten-thousandths of an inch limits.
Uniform compression and exceptional
power smoothness are the results of this
expensive and unusual manufacturing
process.

From the beginning to the end of engine
and chassis manufacture, Hupmobile in-
sists on such strict adherence to quality
standards—and willingly pays 10% more
because it knows its owners get far more
in performance, low costs and long life.

These are some of the many reasons why
you may expect not only brilliant and
sustained performance from the Hup-
mobile Six, but a pronounced economy
of maintenance as well.

RECREATION FOR RICH**

J. L. Guyon About to "Drive"
"more skill than golf," says Guyon.
"If you don't believe it, try it. The
trick of striking the ax into the
wood at just the microscopic angle
that will slice out the largest possi-
ble segment of wood is just as deli-
cate an operation as anything you
can do with a mallet or putter."
"A man gets all wrapped up in
an attempt to beat his best score
with the ax. We have rules, too.
We fix par at a certain number of
strokes, depending upon the kind of
wood and the thickness of the log,
and the luckiest one who can't cut
it is marked with the dub."

fine points of a real contest.
There is rivalry to determine who
can split the most slabs of wood
with the fewest strokes, who
can sink the ax deepest, who makes
the prettiest cuts.
