During the season of 1926 there has been considerable mileage of paved roads added to our county system. While all of these roads are not as yet finally completed, it is expected to have them finished before the end of the year. Briefly the roads which have been under construction are as follows: Twelve Mile road from Southfield road to Orchard Lake road south, from Orchard Lake road south, from Walled Lake to the North Farmington road to the present terminus; Coolidge Highway from Eight Mile road to Woodward avenue; Stephenson Highway from Eight Mile road to the Eleven Mile road; Ten Mile road (completion of east-two miles); Flint street in the village of Orion...

"Maintenance of gravel roads is accomplished by means of tractor graders, stationed a few miles apart, that do continuous floating on the surface. Heavy tractors with graders and scarifiers go over sections that are rough when the lighter equipment does not produce a smooth surface."

"The maintenance of concrete consists of tarring all cracks and joints and the patching of all broken portions of the slab. Weeds and brush are cut during the summer season. All our roads are occasionally gone over by means of truck plows and where snow drifts are unusually heavy snow plows soon open the roadway."

"Oakland County is developing rapidly from a real estate standpoint and hundreds of new homes are being erected. Thousands of people are attracted to our lakes and hills and are purchasing property with a view to making it their homes. All of this is made possible by the construction of adequate highways, highways not of the width of the old wagon days but of the new means of transportation the automobile."
