

STATE LEADERS SEE FRED W. GREEN WIN BY GREAT MARGIN

September Vote And Canvass Of Groesbeck Supporters Factors

SEE THROUGH VICTORY

Lansing, Mich., Oct. 28.—That Mayor Fred W. Green, republican gubernatorial candidate, will sweep Michigan in the election, Tuesday, Nov. 2, by at least the usual republican majority over the democratic candidate, is generally conceded here in state official circles. It is maintained there is no reason why he will not receive that margin in the approaching election.

Two angles of this forecast are emphasized. The first one has to do with the figures and the history of the past, including the enormous primary vote—recorded Mayor Green last Sept. 14. The second relating to the situation falls to reveal any strength for the democrats from the Groesbeck standpoint of things.

In the primary Mayor Green received 397,700 votes. It is conceded that is probably one-half of all the votes that will be cast in the election November 2. In the next place, it is pointed out that Governor Groesbeck received 237,337 votes, and that beyond any doubt Mayor Green will receive a big majority of that vote. The total republican primary vote on September 14 for governor was 635,097.

Democrats Voted.

There were thousands of democrats who voted in the republican gubernatorial primary. That is a fact, conceded even by the democrats. They were attempting to nominate Governor Groesbeck for the republican place on the ticket, so the story goes. They failed. Now those votes will in the main be cast for William A. Comstock, democratic nominee, in addition to all other democrats who vote their ticket this year.

This state of affairs in the primary only adds to the weight of the overwhelming majority of 160,000 votes which Mayor Green received over Governor Groesbeck, and shows the solidarity of his party behind him. Mayor Green will receive the rank and file of his own party vote, according to leaders here, and in addition will receive some democratic support.

On Increase.

Two years ago Governor Groesbeck, as the republican gubernatorial candidate, received 739,225 votes in the election, as against 543,577 votes for Edward Frensdorff, the democratic candidate. The margin is overwhelming. At the same time the democrats point out that Frensdorff received 50,000 votes more than any democratic candidate ever before received. That is true, but the voters of Michigan have been on a rapid increase, and this increase more than makes up the democratic claim. The normal republican majority has been more than keeping pace with the increase in Michigan voters, and the recent primary shows that Mayor Green, from the standpoint of statistical facts, compared with other primaries and elections, will on November 2 pile up a big margin for governor.

According to republican leaders

here the rumors of the Groesbeck support for Comstock, the democratic candidate for governor, are "fast and loose." The rank and file of the Groesbeck men and women will vote for Mayor Green. The leaders here suggest that the only Groesbeck supporters who may vote for Comstock are the comparatively few who have personal interests at stake. That reported situation is discounted exactly in that degree.

That Mayor Green will be elected governor by a most pronounced majority in Michigan for an "off year" is admitted by those who most closely follow political events here.

Planting May Be Done Before Winter

By R. W. LESSING

Surely it is a comfortable feeling when winter settles down, to have the planting all done and the beds all made ready for winter. Unless you are very tardy and the season is most unusual, you get every thing completed without trouble. Often cold snaps are followed by a period of very weather, an ideal time for planting dormant deciduous stock.

If a late shipment comes in, it may be planted any time the ground is open and the soil is right, providing the temperature is above freezing. Late shipment of bulbs, can also be planted when the ground is not frozen. Bulbs should have a chance to make some root growth, so it is advisable, when planting late, to mulch the ground well to keep it from freezing as long as possible.

A check-up on all the newly planted shrubs to see if they have been suitably trimmed will not be amiss. Most newly planted shrubs should be cut back at least a third or a half. If this is done, the stems are less liable to dry back and the plant will do better the first growing season.

It is desirable to stake newly planted trees to prevent their swaying in the wind. In cold climates, it is a good custom to wrap the bare newly planted trees, especially the maples to prevent bark damage. The covering keeps the late winter sun from warming the bark, and encouraging sap to flow, which often results in a great deal of damage to the bark from later frost action.

F. & A. M. CONFER DEGREES TODAY

Birmingham Lodges No. 44 F. & A. M. is meeting today to confer the M. M. degree. Lodges open at 4:30 p. m. Dinner will be served at 6:45 p. m. and the degree work will be done after that.

A regular meeting will be held Nov. 4, and Nov. 11 the F. C. degree will be given. The E. A. degree will be conferred Nov. 18 and the M. M. again Nov. 25.

Election of officers will be held at the regular meeting Dec. 2, completing the calendar for the present year.

Y. M. C. A. DIRECTORS

C. J. Shain and Clarence Vliet are members of the new board of directors of the Birmingham branch of the Y. M. C. A., appointed at the meeting last Wednesday evening. They are in addition to the several other names published in last week's Eccentric.

Telephone your Classified Ads To The Eccentric before Wednesday evening.

BUILDING PERMITS TOTAL OVER \$91,000

Construction Program Continues Busily In Past 3 Weeks

Keeping well ahead on its construction program despite the coming of winter, Birmingham during the past two and one half weeks has issued \$91,000 worth of building permits according to figures released from the office of the village clerk yesterday.

Seven of the prospective construction jobs are residences costing between \$6,000 and \$16,000. A lumber store yard and a stable are the only commercial buildings besides the Briggs project. Garages to be moved, constructed, or remodelled, total seven.

Smith and Poppleton, renters in the Wooster Building, will build a \$15,000 residence with garage in connection on Mohagan street. Valmore-Woods Co., will erect a home on Glenhurst drive for D. J. Woods of Fordon, at a cost of \$12,000. R. A. Bailey, Jr. is building two homes on Baldwin avenue, for \$13,000 and \$8,500.

E. W. Sanders will build a home on Northlawn drive for \$16,000. A residence and garage, costing \$6,000, will be constructed on Villa road by Donald D. Nutt and Otto Boer, and K. H. Hans will construct a \$300 stable at 225 Bennaville.

New garages to be built include: E. G. Emerson, 230 Chapin street, for \$300; Mrs. Henry Kothe, 123 Emmons, for \$75; S. H. Wilkinson, 525 Stanley street, for \$200; T. C. Tunley, 120 East Ruffner street, for \$250; and L. J. Wright, 102 Bennaville, for \$100. Truman Miller, 109 East Lincoln avenue, will put an addition on his garage at a cost of \$150. Edith and Otto Boer are to move a garage from Cedar drive to Edgewood avenue.

A cork which has four projecting sharp points, with a metal top, has been designed, especially intended for use in bottles containing poison.

Birmingham Scouts Help At Hunt Races

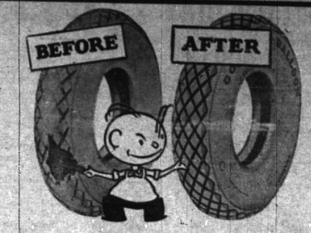

Twenty-eight Birmingham Boy Scouts officiated at the Bloomfield Hunt Races Saturday, selling programs, parking cars, ushering and performing other services. They worked under the leadership of Howard Grell and Lloyd L. Stanley. They were there from 9:30 a. m. until 1 p. m., taking their lunch on the grounds.

Three local scouts, one from each troop, ushered at the Michigan-Illinois game at Ann Arbor, Saturday, also.

PIERCE SCHOOL DINNER TO RAISE BOOK MONEY

To secure money for the purchase of books for the Pierce school library, a dinner was served at the Pierce school recently by the Pleasant Day club, a group of women residing near this school.

STATE OF MICHIGAN, COUNTY OF OAKLAND.—
Each residing before George H. Martico, a Circuit Court Commissioner for Oakland County, between Buckley Development Company, a Michigan Corporation, Plaintiff, and Peter A. Koscovec, Defendant.
Summons having been issued in this cause and service thereof observed, and it appearing by affidavit on file that the defendant's address is unknown.
It is Ordered, That said defendant appear at the office of the undersigned at his office in the City of Royal Oak, Oakland County, Michigan, on the twenty-third day of November, 1926, to defend the complaint filed in this cause, or judgment will be entered by default; and that this order do serve or publish, as required by statute.
This writ is brought to terminate the interest of the defendant in a certain land contract for the sale of premises described as:
Lot numbered twenty-two of McQuinn-Edwards' Best Subdivision of the East half of the West half of the Southeast quarter of Section 16, Township 35 North, Range 10 East, 3rd Meridian, Oakland County, Michigan, according to the plat thereon recorded in the office of the Register of Deeds for said County, in Liber 81 of Plats, on Page 9.
GEORGE H. MARTICO,
Circuit Court Commissioner,
Oakland County.
Dated: October 19, 1926. 28-30

People are just beginning to learn what Tire Vulcanizing really is and means!

Once upon a time, Mr. Motorist would throw his cut and bruised tires away and go to his tire store and buy another set.

He might complain about the service which the last set had given him or he may have felt quite satisfied with the mileage.

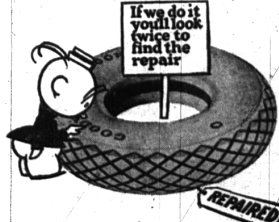

But one thing he failed to do was this: He never thought of asking the repair man about the possibilities of fixing what he thought was a "Ready for the Junk Pile" Tire.

He may have used a boot to carry him over to the next stop, but a boot is seldom good for many miles and certainly does not "Make for Peace of Mind" to the driver. In fact, he did not think of getting a seriously damaged tire repaired.

But all that was before he ever heard of Vulcanizing

NOW, MR. MOTORIST TAKES HIS BRUISED AND CUT TIRES TO A TIRE SERVICE STATION AND SAYS TO HIMSELF:

"This damaged tire of mine has given me 10,000 miles, which is only half of the life of the guarantee. I have learned that vulcanizing will last the life of the tire. Since this is true, after I get my tire back, I will be safe for a long time to come."

"STERNAL FOR VULCANIZING"

Buy more than just a battery

13-plate \$13.95

TOM, Dick and Harry may build batteries. But PREST-O-LITE builds service and satisfaction. We've banished guess-work and gamble, and built into a battery the very thing you want to get out of it—longer life and perfect performance. The PREST-O-LITE you buy today is the result of twenty years of "know-how".

A New Portable Oil Heater

For Garage, Home, Office, Shop, Store, Farm

FLORENCE UNIVERSAL OIL HEATER

Electrically lighted by button under tank. Heated by powerful 15-inch giant burner, operating on the most advanced principle of combustion engineering. Lever under door regulates heat at any desired intensity. Height heater, 37 inches; width, including tank, 25 inches; depth, 17 inches; net weight, 62 pounds.

HERE is a new and different kind of oil heater. It is more than an emergency heater. It is built for permanent use and to give an abundant supply of intense heat. Where the expense of fueling coal stoves, installing or extending furnace or steam pipes is not warranted, the Florence Universal Oil Heater is just what you need.

Place it in your garage, office, store, shop, farm building or home. Place it anywhere that heat is needed and you have a source of heat that is economical and plentiful. Ideal either for a primary source of heat, or as an auxiliary to your present heating system.

No matches needed
Lighted by electricity! Just press a button. An electric spark from the spark plug lights the burner. Could anything be simpler? And safer? A big tank holds two gallons of oil, enough for continuous use at top heat for 24 hours.

See the hood in illustration in left column. This focuses intense heat on your car where it does the most good—right on the radiator and engine. This makes your car start easier and greatly reduces the possibility of costly damage by freezing.

Nothing better or more economical for the small store, shop or residence. No fuel bins, ashes or dirt. No installation expense. Lighter, easier to use. Saves penative fuel you can get anywhere.

Safe :: Economical :: Intensely Hot
