## Three Youths Are Robbed

(Continued from Page 1) 10:30 that night, after the youths had retired, they returned and forced them to hand over their valuables.

One of the robbers brandished a revolver and another, a knife, while the other two searched the tent. They threatened to shoot the tent. The matter was reported to the sheriff's office immediately and a thorough search of the neighborhood was made. This did not result in the finding of any clues.

The bandits were described as being well dressed and between the ages of 20 and 25 years.

Tom Gordon, 42 years old, formerly of Birmingham, Pontiac, is under \$2,000 bond today on a charge of violating the prohibition law after a police raid on his home and the confiscation of alleged liquor valued at \$1,500.

City police, members of the sheriff's department and state troopers made up the raiding party that entered the Gordon home Friday night, armed with a search warrant, and arrested Mr. Gordon.

Because of the many kennels of police dogs on the Gordon property the officers were armed with high powered shot guns. No resistance was offered, however.

## GOOD OLD WATER TANK MAY BE REPLACED BY POOL

(Continued from Page 1) has been practically useless. The two duplex pumps and the cross compound pump installed there have been out of use for some time, and have been sold.

The only thing really of use in the pump house is the automatic control of the outlying pumps, an electrical device which automatically keeps the pumps from getting too much water into the tanks. The control can also be worked by hand.

This control will be installed in Mr. Purvis' new home at Martin and Henrietta streets, either in the basement or in the garage. The hand control will be moved first and the automatic control later, so that at no time will Mr. Purvis be where he cannot take care of it. Mr. Purvis will be in charge at the new pump house on Baldwin avenue, just north of west Maple.

The largest water tank in the village is at Lincoln and Pleasant avenues, where, with 25 horsepower engines, water is pumped at the rate of 1,000 gallons a minute. This has a 200,000 gallon capacity. At night the water is pumped at the rate of 600 gallons per minute. The old pumps could not carry water from far enough away for the growing water needs of Birmingham. Deep well pumps became a necessity. A 175 foot mineral

well at the old pump house provides a drinking fountain which will be particularly useful when the ground is made into a public park, as present plans indicate it will be.

## Franklin Village

Away from the smoke and heat of the city, situated amid the hills of Oakland county, Franklin Village is like a refreshing bit of old England. To discriminating persons it is really planned, well restricted properties make a vivid appeal. There are few such opportunities left in the Bloomfield Hills section. A number of well known people have purchased building sites here, but the present prices are such that these purchases are as desirable for investment as for home-building. Franklin Village is in the very heart of the country club district, secluded, yet convenient. You will like its roomy home sites, which are from a third acre to two acres in size, laid out to conform to the natural topography of the land.

Drive out Maple Road west of the Oakland Hills Country Club to Franklin Road. There you will find it.
