Motor Trucks Ride Mule-Back

Forty Graham Brothers trucks and commercial care rode mulc-back over the narrow pack trails of the Andes Mountains into the Valley of Bucaramanga, Columbia, during the last year. The mules shown above each carry about 140 pounds of parts, large assemblies like the motor being swing between two to four of the four-fooded transportation units. The map shows the great difficulties overcome in getting the trucks into the valley, and illustrates the record demand for Graham Brothers products everywhere.

built to standards of accuracy once thought impossible except hand-built cars"

You have frequently heard that the Greater Oakland Six is built to standards of accuracy once thought impossible except in hand-built cars. And perhaps you have doubted the statement, believing that no car so low in price could possibly be manufactured with such scrupulous super-precision.

But if you could see the Greater Oakland Six being built, your own eyes would convince you. You would see piston pins rejected if they varied more than two ten-thousandths of an inch-none-fortieth the thickness of an average human hair.

You would see all revolving parts, from crankshaft to rear axle, being balanced as a unit to such a degree of accuracy that the pleasure of owners is never marred by transmitted vibration.

You would see operation after operation equally unusual, even in a plant where higher priced cars are being built——for Oakland is going to unheard of length to keep the Greater Oakland Six the best-built car of its price in the world; to enhance to an even more marked degree its reputation for stamworld; to enhance to an even more marked degree its reputation for stam-ina, long life and low cost maintenance. SEDAN

Oakland Six, \$1025 to \$1295. The New and Finer Pontiac Six, \$775 to \$975. All prices at factory. Deliwered prices include minimum handling charges. Easy to pay on the General Motors Time Payment Plane
