

GIRL ON WAY TO RECOVERY

Miss Marjorie Barnes, Hurt In Detroit Accident, Improves

Although she is still in a serious condition, Miss Marjorie Barnes, R. F. D. No. 4, Birmingham, who was injured by a street car last Thursday evening in Detroit, is said to be recovering today in Detroit Receiving Hospital.

Miss Barnes who is 21 years old, was struck by a Piquette local car at State street and Woodward avenue. She is the daughter of George Barnes.

Thomas Foster, 142, Ruffner street, was the motorist on the car. He was not held.

The Great Roll of Honor of the American Army, recently printed in book form, contains 10,010 names.

VILLAGE GIRL HURT WHEN AUTOS CRASH

Miss Ruth Gill, 237, Emmons street, is recovering at her home today from injuries received in an accident Sunday night in Hazel Park. Miss Gill received painful cuts, but was removed to her home after they had been treated by a doctor.

The accident occurred on the Nine Mile road near Coolidge high way, when the car in which Miss Gill was riding with John McKeup and John Dutton, 422, Maple avenue, was struck by one driven by John A. Forsyth, of Howell. Forsyth's car struck the turtle, according to Deputies Walter Altschbach and Thomas Stapleton.

With Forsyth in his car were Miss Jessie Spauling, 12,058 Barnard street, Howell, and Ernest Hall and Marie Douglas, of Redford. None of the others was injured.

MAN BREAKS LEG AS GLASS FALLS

George Roseman, 13,881 Goddard avenue, Detroit, is recovering today from a broken leg received Saturday morning when a crate of plate glass fell on him at the Redford Country club, on the Twelve Mile road, where he was working. He was rushed to St. Joseph's Mercy Hospital, in the Barnes and Bell ambulance. He is expected to be released within a few days, hospital officials say.

Roseman is employed by the Lehner construction company, of Detroit, which is building an addition to the club house. He is a Negro.

'28 AUTO TAGS GOOD ON DEC. 1

Drivers May Employ New Numbers Before New Year

"Automobile license plates for 1928 will be allowed after Dec. 1, 1927, it is announced today by James Anderson, chief of police.

"In order to encourage owners to get their licenses early, so that they can all have their new ones by Jan. 1, we shall recognize them after Dec. 1 as perfectly legal," Chief Anderson said.

The announcement for Birmingham holds good throughout the State. Chief Anderson explained. John S. Haggerty, secretary of state, notified all sheriff and police departments of the ruling, which is in accordance with the usual arrangement.

VILLAGER'S KIN SUCCUMBS AT 73

Mrs. Etie Kimball, Half-Sister Of James Wooster, Dies In Pontiac

Funeral services were held Monday afternoon for Mrs. Etie Kimball, 73 years old, of 109 Lafayette street, Pontiac, from the Sparks' funeral home, with interment in Roseland Park cemetery. Mrs. Kimball, a half sister of James F. Wooster, of Poppleton avenue, died suddenly Saturday morning at the home of her niece, Mrs. L. Avery, at Dryden. Heart trouble was the cause of her death.

Mrs. Kimball, from the age of seven to twenty-seven, lived with her parents on the old Wooster farm, now part of the Birmingham Golf course. She then moved to Pontiac, where she lived since. She was married to Henry Kimball 40 years ago. They had no children.

Services were conducted by Rev. Weldon S. Crossland, pastor of the Central Methodist Church of Pontiac, where Mrs. Kimball was a member. Besides her half-brother Mr. Wooster, of Birmingham, Mrs. Kimball is survived by another half-brother, E. H. Wooster, of Sterling, Ill.

COMMISSION ORDERS LICENSE REVOKED

The village commission last night ordered the license of the Gabels Creamery company revoked, following a report from Dr. A. W. Nowitt, health officer, who said the creamery failed to pass with the required rating in a bacteria test.

PROSPERITY IS SERMON THEME

Rev. Woodward Addresses Congregation of Subject of Week

"The Dangers of Prosperity" was the theme chosen by Rev. David Leon Woodward, pastor of the evening service Sunday. "During this week we have heard much about prosperity," he said. "I am sure after enjoying a week of prosperity we are apt to feel that prosperity is our greatest source of happiness and should be sought after above everything else. We are not against prosperity, but let us be alert in planning a wrong emphasis upon the things of the world, we are being led to think of us about the Dangers of Prosperity, he continued.

It is our greatest source of happiness and should be sought after above everything else. We are not against prosperity, but let us be alert in planning a wrong emphasis upon the things of the world, we are being led to think of us about the Dangers of Prosperity, he continued. "The danger to three wealth, fame, prosperity and success into a moral deathtrap as we are being led to think of us about the Dangers of Prosperity, he continued. "The danger to three wealth, fame, prosperity and success into a moral deathtrap as we are being led to think of us about the Dangers of Prosperity, he continued.

On every fall, love and adversity are not, in themselves, passports to saintship, as we are being led to think of us about the Dangers of Prosperity, he continued.

very apt to burn your foliage, so I would be very sure to at least dilute it down to one to twenty. On small trees this insect can be controlled by cutting out the galls, while they are still green, in July and August. In collecting and burning these galls while they are green the insect is destroyed because it is on the inside of the gall formation and has no chance to escape.

To a later inquiry, the professor replied: "The Siam people have a spray on the market, which is obtainable at any of their gasoline filling stations. Sometimes the spruce gall aphid will attack the Colorado Blue Spruce, but this insect can be controlled very easily by cutting off the galls and, just as effective as spraying. The only trouble about this is that it spoils the appearance of the tree, the symmetry of which is preserved by spraying. I hope that the above information will be widely disseminated throughout this state, where so many Norway spruces are grown and that it will be widely commented upon by the State Press. As my Norway spruce emanated from the same nursery, I am naturally inclined to believe they were infested when planted.

In order to enable those interested to see what the spruce galls look like, I have placed a twig with formation in the window of this newspaper where it can be conveniently inspected.

Oak Favored In Grid Tilt

Teams which are fabled as having easy victories awaiting them

Must Upset Dope
Birmingham must feature an upset to conquer the crew coached by R. Kenaga and captained by "Doc" Morrison (tomorrow or else take a very minor part in the scoring). A great deal more spirit then demonstrated in the Richmond clash must be shown if the villagers avenge last year's drubbing from the down Woodward battlers. However the Richmond game may serve as a eye-opener for the team and add more fight and determination for tomorrow's bout. After the trouncing last Friday, the team is hoped to have found its feet again for its final encounter. Royal Oak on the contrary may preface out on Cass Field with an air of confidence established by the easy win from Ferndale and its strength throughout the season.

Final practice ends tonight for the local squad. Thinking for the past three days has consisted of fundamental training in the major departments of the game, such as blocking, tackling, charging and ball carrying, signal practice and kicking, in the afternoon, and "skull" practice each evening for an hour.

Almost the entire student body with many villagers are expected to travel to Cass field to witness the game tomorrow.

WARNING GIVEN IN SAVING TREES

Physician Relays Formula To Combat Insect Attacking Blue Spruces Here

By DR. HUGO ERICHSEN
About two or three years ago, I planted a Norway Spruce, among several other conifers, on my front lawn. When it died, I attributed its death to improper care at the time of planting and had it replaced. But when the second tree died like the first, the needle falling off and the branches drying up, I sat up and took notice as the saying is.

I sent a specimen twig to the Michigan State College, with an explanatory letter, and received the following reply from Prof. Karl Druce, the instructor in forestry:

The sample of Norway Spruce, you sent is infested by an insect known as spruce gall aphid, or Chermes abietis. The insect originated here from Europe. New York State and has spread from there westward until now it is quite common in certain portions of Michigan. The twig beyond the gall usually dies and in bad infestations they usually cause deformities in the branches. The light yellow eggs are usually deposited in a white mass at the base of the buds. The eggs hatch in about a week and the young crawl to the tender shoots and establish themselves in the leaves of the young galls that have already started to form. The insect then closed in a cell and all of these together form that growth, which reminds one of a miniature pineapple. Early in August the galls lose their dark-green color, turn yellow and crack open. It is at this time that the so-called gall louse escapes. The young usually winter over on the leaves or base of the buds.

"I believe that you will have very little trouble in controlling this insect if you use a good contact spray such as nicotine oil, diluted one to twenty. An oil solution that is too heavy with oil
