WE ARE appreciative of the fact that with the large increase in demand for the Packard car you may be under the impression that delivery cannot be made for several months. This is wrong. During this year Packard has invested nearly ten million dollars in increased manufacturing facilities...

Why not buy a Packard Six today, pay for it within a year, as many prefer to do, and then keep it five or more years as does the average owner? If your present car is of average value it will more than make the new car down payment and leave no cash outlay except for the small monthly notes.
