Man Found Dead While At Work

(Concluded from Page 1)

The coffee man who was found dead in his lunch pail to work was identified as John J. Clark. However, there is no record of a man by that name, and it is considered it unfortunely.

The presence of the potassium cyanide was unmistakable according to reports from doctors which state that the coffee was left. The chemical is used in steel making and is a powerful poison.

Phillips inquired if where he worked was broached.

Phillips was the father of seven children who are living in the east of Troy Center. The man was known to be in poor financial condition.
