SOMETHING NEW . . . comes in every day at Birmingham's Favorite Store

without the rest of the school being open.

Modern Gymnasium
 The gymnasium itself is as modern and completely equipped as a gymnasium can be. It also may be used as an auditorium. The seats which are to be placed there in times of assemblies are put on small cars which run on tracks under the permanent bleachers at the rear of the room. A motion picture machine has been installed and the room equipped for motion pictures, with heavy shades for darkening. The stage is furnished with dressing rooms which, although simple, will provide for dramatics. The outstanding feature of this room is the fact that there are no echoes. The walls of rough brick and cinder block and the celotex ceiling which is painted in mosaic effect prevent any echo in the hall.

There will also be an opportunity for recreation out-of-doors when the parallel bars and rings are installed in the back of the building. A large playground has been seeded downward a natural grove left for the children.

A boiler room in the rear of the locker rooms is equipped with huge boilers and water softeners. There is a large elevator for the removal of ashes and a coal cellar extending far under the ground. The entire building is heated by steam heat.

A thoroughly modern ventilating system draws air from the roof.

MEALTIME STORIES
 BY THE MAN-IN-THE-MOON

The fish that swim in Northern Seas
 Are caught by men with nets like these.
 They take them to the canneries
 And cook and can 'em, if you please.
