$1 to $6 per pr.

Drape Suggestions
Many New Designs in Cretonnes

In Washington, D. C., it was the experience of the writer to find that housewives took the drapes down in the summer. The drapes were simpler; it made better ventilation possible. And so we face the warm weather in Birmingham. The old velvet and wool of winter use must come down. Cretonnes will take their place. Drapes are attractive in any home, but they must be practical, too. And so we take this time to remind you of the wide variety of cretonnes from which to choose those new warm weather drapes.

Air Record Seeker

The air record survey just completed by the Associated Commissions of the United States Chamber of Commerce is one of the most exhaustive mass surveys ever made. The American Radio Manufacturers Association (ARMA), which sponsored the survey, was among the most extensive of the various federal radio commissions. It conducted the examination of the airwaves in a study of the nation's radio receiver industry, with a view to the production of a report on the current state of the radio industry.

DEAR ACTIVITY OF RADIO TROUBLE

Radio trouble is a problem that is constantly on the minds of radio enthusiasts. There are many causes of this problem, and the solutions to these problems are as varied as the causes themselves. Here are some possible solutions to radio trouble:

1. Check the wiring and connections: Ensure that all connections are tight and secure. Loose connections can cause radio trouble.

2. Check the antenna: A poorly aligned or damaged antenna can cause interference and make it difficult to receive radio signals.

3. Use a radio receiver: Some older radios may not be able to receive modern signals. Consider upgrading to a modern radio receiver.

4. Check the power supply: A fluctuating power supply can cause radio trouble. Ensure that the power supply is stable and consistent.

5. Contact a professional: If you've tried all the above solutions and still face radio trouble, consider contacting a professional for further assistance.

BANKS HEAVY USERS OF AIR MAIL
GOVERNMENT SURVEY SHOWS

The air mail survey just completed by the Associated Commissions of the United States Chamber of Commerce shows that there is a need for increased air mail transportation. The survey also indicates that air mail is a viable option for transporting goods and materials. This information is important as it helps to determine the future of air mail transportation.
