**STROPPING IS ESSENTIAL TO THE PERFECT SHAVE**

**the new Million Dollar Razor**

**is a nationwide SENSATION**

**Absolutely proves that stropping is essential to a perfect shave**

**The new Valet AutoStrop Razor** was introduced last May. It created a sensation. Small wonder, since it proved a vital fundamental of successful shaving.

Its automatic self-stropping feature demonstrated that all barbers are right—have been for 2,000 years. Because they always strop their razors before they start a shave.

The reason for this is that after the first shave the cutting edge of the finest blade can be made is a row of minute needle points until it is properly stropped. This smooths out and re-aligns these tiny jagged hooks.

Everywhere wise men are turning to the new Valet AutoStrop Razor because it is the only razor that sharpens itself and assures you of a super-keen smooth shaving blade.

What's more, 21 years of research and a million dollars have been spent in improving the new Valet AutoStrop Razor.

Not only the razor itself but the blades have been materially bettered. A new type guard enables you to use the full shaving edge of these keener blades. You insert or remove them instantly by pressing a button. Blades are locked in a firm, non-flexible grip that eliminates vibration and pull. No need to remove the blade to strop and clean it.

Try the new Valet AutoStrop Razor. Give it a fair test. You'll soon be fast friends with it.

You'll enjoy the most perfect and fastest shave you ever knew. And you'll hold up your hand and say "Never Again!" to the use of an unstropped blade.

Beautifully finished models complete with blades and an improved strop in handsome cases at \$1.00 to \$2.50.
