## How to Achieve Beauty

by HELENA RUBINSTEIN

If you have simply let yourself "run to seed" for weeks or months or years, one of your chief grievances will be the condition of your eye tissues. Either one of two things has happened. The flesh has relaxed and grown wrinkled, discolored and unhealthy looking, or heavy "puffs" have formed directly under the eyes.

Either condition is an unhappy one, as undoubtedly your mirror confesses to you. But—as a word of cheer—let me assure you that neither condition is a hopeless one!

In suggesting treatment to you, I'll begin with the undernourished wrinkled condition first, as it is by far the most common, judging from the volume of mail I receive. To vigorously rub an anti-wrinkle cream into the eye tissues

## Animation Expressed In Frilly New Frocks

By LUCY CLAIRE  
Fashion Expert for Central Press and The Eccentric

Although we have not gone back to the normal waisting its influence has been felt especially in the return to the princess frock for evening. To be sure it does not display the decided curves of that former mode where the gown was actually molded to the figure. But it has supplanted the extreme straight lines which the unfeminine era following the war impressed upon fashion.

Ruffles, panels and draped bouffants, all have had their part in bringing the princess lines back to the evening gown. For such distinctly feminine frills hardly harmonize with the severity of the straight up and down lines that our evening mode displayed. The charm of the new frock is undisturbed. Such animation and form have not been seen for many years.

- ### Today's Recipes
- Cream of Lima Bean Soup**—One-half cup dried lima beans, one cup milk, one teaspoon butter, one teaspoon flour, one-half teaspoon salt, one-eighth teaspoon onion salt. Soak the beans in cold water over night. Cook in a quart of boiling water and let simmer until the beans are perfectly tender, then put through a colander. Make a white sauce of the milk, flour, butter and salt. Add the bean purée and onion salt just before serving.
- Bran Bread**—One and one-half cups warm water, two cups white flour, one and one-half teaspoons salt, one-fourth cake compressed yeast. Make a sponge by dissolving the yeast cake and salt in the warm water, stirring in the flour and setting to rise in a warm place. When light and bubbly add the following: Two tablespoons sugar, two cups bran, three cups white flour, two tablespoons molasses, one tablespoon melted butter. Stir the molasses, sugar and melted butter into the sponge; then add the flour and bran. This should make a rather soft dough, but not too soft to be kneaded upon the board thoroughly. Stand in a warm place until rises to double the size. Bake in a moderate oven (250 degrees Fahrenheit) for one hour. This quantity should make two loaves.
- Orange Jelly**—Two tablespoons granulated gelatin, one-half cup cold water, two and one-half cups boiling water, one cup sugar, one cup orange juice, one-half cup lemon juice, one-half teaspoon salt. Soak the gelatin in the cold water, dissolve in the boiling water. Add the sugar, stir until dissolved. Add the fruit juice. Pour into a mold to chill and set.

- Man: Don't come around this week. My wife's people are visiting us. She's bootlegger. And they object to liquor!"
- Man: Not at all. They brought some with them.
