**You've Seen Nothing to Compare with the NEW 1929 CENTURY HUPMOBILES**

With a majority of 1929 models revealed, Hupmobile relinquishes not one iota of the style and value leadership it has held among fine cars since the first Century models were announced last fall. Brilliantly refined in tailored metal appearance and luxury of appointments, the new 1929 Century Six and Eight now more than ever present the century's greatest advance in mechanical excellence, body design and beauty. By direct comparison and your own sense of values, you will select a new Century Six or Eight as the most modern development of twentieth century transportation. Forty-two body and equipment combinations, standard and custom on each line. Six of the Century, \$1345 to \$1645. Century Eight, \$1825 to \$2125. All prices f. o. b. Detroit.

**FOUR 'ONLOOKERS' INJURED BY CAR**

Viewers Of Wrecked Autos Struck By Motorist; Injuries Slight  
Four persons are recovering to-day from injuries incurred when they were struck by a machine while looking at the wreckage of two cars at Woodward avenue and the Manor road.  
None was seriously injured and the driver of the car which struck them was released by Birmingham police after he agreed to pay the bills for medical attention given to the injured. He is Lionel Chamberlain, 4323 Lewis avenue, Fordson.  
Those injured are: A. H. Standridge, Hope Marion Hershall Forest and Myrtle Mooney, all of Detroit. No one was injured in the wrecked cars they were inspecting.

**UNDERTAKER LOCATES HERE**

G. Dewey Kimball, undertaker, announces his establishment at 290 north Woodward avenue.  
Mr. Dewey has been in the undertaking business for several years, coming to Birmingham from Detroit where he was connected for the past two years with F. G. Marshall Sons.  
He is an Oakland County man and was born at Orion.  
He has also been in the undertaking business in Fenton and Cincinnati, O. He studied embalming at the Cincinnati College of Embalming.

**FIGURES ANNOUNCED IN SALES OF TIRES**

"More indisputable evidence of the popularity of Goodyear tires is given in the semi-annual report of the Goodyear Tire & Rubber company, released a short time ago," said F. E. Starnal, Goodyear dealer at Woodward and Daines street.  
"In the face of greatly reduced prices for the entire line of Goodyear tires and other difficulties under which the company operated by reason of the drastic decline in crude rubber values incident to the lifting of restriction on rubber exportation from the British producing area in the Far East—a decline of from 41 cents in January to 19 cents at June 30—net sales reached \$125,777,548, an increase of \$7,533,315 over the same period last year.  
"The volume of business done by the company from January to June was the greatest for any six months period in its history and the full import of the statement is not realized at first glance, because the quantity of product sold was greater than indicated by the increase in dollar sales, because of lower selling prices prevailing this year."

A San Francisco inventor has patented a new gas burning heater that can be built into the floor of a room.

**LOOK WHO'S BACK WITH US AGAIN**

Smiling and as jolly as ever is Sir Thomas Lipton, noted British sportsman, on his arrival in New York from England. He is shown aboard ship with Charles A. Levine, first transatlantic air passenger, who was a fellow passenger. Sir Tom says he plans once more to challenge for the America's cup, international yacht racing trophy, in 1929.

**STATE ACTS AGAINST BIRDS PREYING ON YOUNG FISH IN HATCHERIES**

Lansing. Three species of birds are more or less active in the destruction of young fish, hatchery men have agreed. It is generally believed that the kingfisher, blue heron and the blackbird have an appetite for fish, particularly young ones that may be seized without trouble.  
Of the three birds mentioned, the kingfisher is the worst killer. Its intentions are clear and frequently he and his family will gather at hatcheries and they constitute a real problem. The State conservation department had one example of this bird's activities brought to its attention recently. At the trout propagation project located on Silver Creek in the Michigan National Forest near Tawas, the kingfishers made their presence felt with a vengeance. The caretakers immediately took steps to counteract the menace, using traps and guns to subdue the raiders.  
Inasmuch as this particular pond was only about 200 feet long and located in a country that was dense with undergrowth, it was surprising that the birds should gather in large numbers. Those who witnessed the struggle were agreed that the news of the trout pond must have come to the attention of all the kingfisher families in the state.  
Where the kingfisher is not protected by the law, the blue heron falls under the migratory bird act and hence it is unlawful to destroy them. But the State is empowered by the Federal government to do away with the blue herons if they persistently hang around the hatcheries and try to gain their board from the supervised ponds. The heron, however, does not compare with the kingfisher as a bad actor, for his numbers are less and he has other sources of food that he relishes. The blackbird is caught in the act of raiding now and then but does not constitute a real menace. He takes up fishing only on occasion, probably as a form of recreation.  
The kingfisheries are taken in traps set on sticks near the water edge. When a kingfisher wants a meal he usually looks for a limb
