 and they haven't spent  
 a single dollar for service

Two years ago this month the General Electric Refrigerator was publicly announced for the first time. Fifteen years of research and development had produced a refrigerator with an hermetically sealed, dust-proof mechanism, mounted on top... a refrigerator with an improved type of cabinet, mounted on legs... one with an accessible temperature control... that established a new standard of quiet operation... that required no oiling... that dispensed with all troublesome machinery... that lowered operating costs... that carried an unqualified two-year service guarantee. A radical improvement has been made in the cabinet! It is noisy-silent! It cannot warp. It is as strong as steel. You can purchase the new models shown at our display rooms on conveniently spaced payments. Tune in on the General Electric Hour broadcast every Saturday evening 8 to 9 Eastern Standard Time over the N. B. C. network of 42 stations.
