## Senator Couzens' Gift

While we admire the spirit in which he made the gift, we have no expectation that all of it will accomplish the purpose for which Senator James Couzens, a resident of Bloomfield Township, has given the ten millions of dollars in the trust fund which he has set up for the promotion of the "well-fare, health, and happiness of Michigan children." However, the Senator's basic idea is fine and good, and from it may and will come much good to a small portion of the world's present and future populace; and his beneficence sets an excellent example for other wealthy men to follow.

The people who enter into the making of the

usace; and his beneficence sets an excellent example for other wealthy men to follow.

The people who enter into the making of the earth's population are of varying degrees of type and intelligence; each brown, yellow, black, and white; of many languages and much confusion; even today they typify the historical stages through which man its aid to have evolved, from "a fire mist and a planet, a crystal and a cell; a jellyfish and a saurian, then a place where cave-men dwell; then a sense of law and beauty, a face turned from the clod—some call it evolution, and others call it is God."

A large proportion of earthly bipeds today muy be elassed, as far as intelligence is concerned, with the jellyfish and the saurian; they are still at sea, such figuratively and literally. Then there is a sax who have climbed to dry land and are shaping them-selves with legs in place of fins or wobbly tails. Few, indeed, are walking upright 'neath the non-days up, defining in the pace and beauty of an orderly world.

## Two Plus Three - Four?

Dishonor and dishonesty, when they take over Lamonor and dishonesty, when they take over the consciouses of a man or a woman, do so only on the pre-arranged understanding that, when Officer Truth comes along, they will offer no resistance to being meted our proper judgment. People, in their thinking and acting, must accept either the right or the wrong rules of conduct; it is as difficult for a man or woman to add to his own potentialities the plans of dishoner or dishonesty and obtain, success and happiness, as it would be no executed. and happiness, as it would be to expect two plus three to equal four. Man plus righteousness always equals success and happiness, always equals four.

### In Defense Of Mt. Clemens

We are pleased to publish the other side of the controversy over the cleanliness of the football game last fall between Mt. Clemens and Birmingham high schools. Here is the defense of the umpire, Irwin Van Tastell, assistant principal of the Eastern High School of Detroit.

To the Editor Birmingham Eccentric, Birmingham, Mich. Dear Ir.

Birmingham, Mich.

Dear Sir:

There appeared in your columns of Thursday, March 21, an article entitled Thursday, March 21, an article entitled Shall We Play Mt. Clemens?"—reference being made to a football game played at Mt. Clemens last fall between the Mt. Clemens last fall between the Mt. Clemens last fall between the Mt. Clemens tan Birmingham High Schools. The article says that it has been reported that the Mt. Clemens team is, un part, dirty? to the point of unfairness. The last paragraph explains that football ought to be kept clean, and that boys playing the game ought to be granted the protection of good sportsmandip.

Having acted in the capacity of umpire in this game and, therefore, directly responsible for the conduct of the players, I wish to make it very clear that there is ground for the accusations. The Mt. Clemens team played good, hard, cleanforbtall. Mr. Remington and Mt. Lawton, the other bofficials, are men whose ability to conduct football games is well known to conduct football games in the game, I am surface of the officials would have detected it. And Clemens, is a marked the processing the process of the highest type of sand the process of the highest type of the process of the highest type of sand
