Master of them All for Winter Driving

LIKE the teeth of a powerful bull-dog, those big, deep, sharp blocks of tough rubber cut in and engage on slippery roads, bringing your car to a sure, safe stop.

Note how these blocks or "teeth" are placed IN THE CENTER of the tread.

Note how the "teeth" also extend UP THE SIDES — to prevent skids on turns — to take hold in ruts—to pull out when tires sink deeply into mud, sand, slush or snow.

More than 20 winters have proved the All-Weather the safest and best of all non-skid treads. Now comes this extra-deep-cut, extra tough, super-odition of that same famous tread to master the very worst driving conditions. It is one of many super features, exclusive to the

DIET—Don't Die Yet

"Perhaps if we diet we won't die yet." Thus did the Toledo Blade recently express a big truth in few words.

The subject of diet is undoubtedly one of the greatest factors of the present day as relates to health.

Proper diet enables stout people to reduce, thin people to put on flesh. It helps to reduce high blood pressure and does all manner of good.

Of course—as is the case of most other things which help to control health—it is best practiced under your physician's direction.

Whenever you need to improve your health go to your physician for guidance.

And when medicine is prescribed remember that we specialize in such work.
