Look for the Name MAZDA on Every Lamp Bulb You Buy!

The trade-mark Mazda on an incandescent lamp is more than a name—it is a mark of research service. It signifies that behind the lamp are years of painstaking effort by the great organizations of the lamp manufacturers, to obtain the most light for the least current. There are cheaper imported lamps—but illumination with these is more expensive because they consume more current for the same amount of light.

The trade-mark Mazda is your assurance that the lamp bulb is a product of the latest and best methods of incandescent lamp making. When better materials and newer manufacturing processes are discovered or developed, they will be used. The Mazda standard of quality is constantly maintained, and a trained research staff is endlessly searching for ways to improve lamp efficiency.

The Detroit Edison Company carries Mazda lamps only—available in fourteen types, ample for all ordinary services. Most sizes and styles are renewed without charge at any Detroit Edison office.
