Supervisors To Hear Proposed County Broadcasting System Plan

Members of the Oakland County Board of Supervisors at their meeting, April 14, will be asked to consider the installation of a county police radio broadcasting system. This action was indicated last week at Ferndale when the inter-municipal transportation committee recommended the procedure to officials of the U. M. C. Co. of Chicago, who have been operating a transportation over a low wave length, in Ferndale for the past two weeks. The company also was requested to obtain the opinion of the governing bodies of the various municipalities in the county.

# Famous Mt. Baldy Trophy won by Dynamic New ERSKINE

At Pomona, Calif., on Feb. 25, an Erskine stock sedan, with optional gear ratio, certified by the American Automobile Association, set a new record up Mt. Baldy, making the winding 7.1 mile climb in 10 minutes, 45 seconds. It won the Progress-Bulldog trophy for the fastest time ever made by a strictly stock car.

Feats such as the record-breaking Mt. Baldy climb are evidence of the Dynamic New Erskine's power and stamina.

# It's wise to choose a SIX!

After all, it is a perfectly simple matter to decide which automobile to buy in today's market. Only two questions must be answered to your satisfaction—

**First: Which car gives the most for my money?**

**Second: Which car represents the soundest investment in satisfaction and pride of ownership?**

In buying a low-priced car consider the following facts:

It is wise to choose a six-cylinder motor—for six cylinders are necessary to take out vibration and roughness. Six-cylinder smoothness will save the motor, the chassis, the body, the passengers and the driver.

The Chevrolet is a six. And yet it sells at a price that anyone can afford to pay.

This very low-priced car lasts longer, not only because of fine materials and oversize parts, but also because it is a six. Its big, smooth, 50-horsepower six-cylinder engine is always "taking it easy." There is no feeling of strain.

With all its six-cylinder smoothness and power the New Chevrolet Six uses no extra gasoline or oil. Efficient design makes this possible—overhead valves—high compression power—from any fuel—very latest carburetor—close-fitting, long-wearing pistons—crankcase ventilation—air cleaner. You can really have extreme economy and still satisfy your ideal of truly modern transportation.

Chevrolet economy is also the mark of Chevrolet sincerity in manufacture. To illustrate:

Chevrolet valves are readily accessible and adjustable. This saves replacing valves, and also makes it possible to preserve the efficiency of the engine.

A similar example is found in Chevrolet's molded brake lining—reducing the necessity of frequent replacement, and consequent expense.

Furthermore, there is a rear axle inspection plate on the Chevrolet.
