ALL MECHANISM ON TOP where it belongs!

THERE are many reasons why all the mechanism of the General Electric Refrigerator is placed on top of the cabinet. Here are 3 vital reasons:

met. Here are 3 vital reasons:

1. Refrigerating - mechanisms
develop heat in the process of
cooling the interior of the refrigerator. This heat escapes
and rises. Therefore, General
Electric has placed therefrigerating mechanism on top to that
the escaping heat travels away
from the cobinet.

2. Placing all the mechanism on top of the cabinet achieve maximum food storage space within the cabinet.

3. With the mechanism on top, the inside of the cabinet is free from obstructions and easier to keep clean.

There are now more tha 300,000 users and not one h-eyer spent a dollar for repair Visit our displayr
