## Is War Really Worth This?

Is War Really Worth This?

Men and women of the United States, engaged for the most part in earning money with which of enlarge their respective spheres of happiness, health, and general prosperity, are required to particulate to a contral government; in order that they, as individuals, may live under the common of what they, pay, however, is easily consumed by the gluttonous appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as shown by the following appeties of the war good, as the work of the following the war was the

ing them, operating the post office and taking care of our international relationships; eight cents out of every dollar is required.

(3). Thirteen cents out of every dollar cover the expense to promote public health, education, aviation, merchant marine, farm relief, and such other matters aiding various groups and classes.

(4). Seven cents is required to handle vectoring the bitterio of Columbia. This tabulation was prepared for President Hoover but it would seem that the titem for vectoral insurance, making tax refunds, and administering the bitterio of Columbia. This tabulation was prepared for President Hoover but it would seem that the titem for vectoral insurance, should be included in the cost of past wars.

1a. ware worth the price, in money and blood-sheel? Then what is peace worth to a civilization?

Alabama's Weakness

The Democratic party in Alabama, alarmed at the increasing number of Republican votes cast during the last Presidential election, met and framed the qualification that allows.

The Democratic party in Alabama, alarmed at increasing number of Republican votes cast dur-the last Presidential election, met and framed Patriotic Sportsmanship

We in the United States today owe our liberty as much to the loyal and steadfast devotion of the for much upon the standard spise and the windershould be successfully barefored, their deposits of the successfully barefored their deposits of the successfully barefored the su ig the last Presidential election, met and framed equalifications that allow a man (or woman) to eccome a candidate on any Democratic ticket. In doing they disqualify people who vote Republican lockets, even though the state law gives them the high to become public officials. Alabama Democrats, in their frenzied effort to make people vote or a party, rather than the qualifications of a candidate, are weakening their cause, for, after all, a arry is only: a name—it's the calible of a man or official that determines the kind of government we thin any fully and some and since we well want to the caller of a man or official that determines the kind of government we

days meant nuch—even though Congress was and selfsh.

## \* American Opinion Abroad

The Havan Post, American daily in Cubs, in an out-spoken editorial, gets off its cheet some of its feeling as to its home Congress. "Tariff making has made Congress a trough in which contesting greeds squeal and jostle in their efforts be monopolize the swill. It has made Congressmen porch-climbers, their chief business to seize other congressmen's constituents, wealth, and transfer it to their own.

"The proceeding is destructive of politics and business morals. It makes government a grad bag lit has mired Congress in a moral swrains, developed a class of men and industries which claim a divine right to ride on other men's and other industries backs. It has spread upon the country a moral economic blight which can no longer be tolerated."

## Eatin' Acorns And Bologney

Eatin' Acorns And Bologney

Michigan editors who live away from the saddening influences of Detroit's metrorobitan area, will be interested in what Eton R. Eaton, publisher of the Northville Record, said about them the other day. Following up some comment that we made with regard to having the Michigan State Bologney Commission settle the dispute between editors DeFoe, of Charlotte, and Hanna, of Harbor Springs, the Northville chap comes back with a declaration which, it is to be hoped, will not go un-thallenged by out-state newspapermen. Here's what Mr. Eaton says about the out-state "squirrels":

"It seems that every time the state of Michigan or some editor from the tall whispering pines and the rock bound coasts find some measly, disgusting little job that should be taken care of, they want the Boloney Commission to act.

"The Bologney Commission long ago decided that Wayne county has already been called upon to donate too much to the charities of the remainder portion of the state. In fact, if it want for Wayne county, the boys up-state would be hoarding acorns for winter fodder.

"It is for this reason that the treasurer of the Bologney Commission lopholds the commission, the Hon. Murl DeFoe, that Wayne county should not be called upon to contribute more to the support of the hingry hordes of the north."

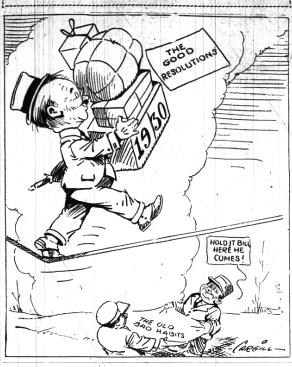

So come on, you out-state scribes, and defend home and country!

So come on, you out-state scribes, and defend home and country!

# An Old Firm In A New Location

Our congratulations go to the Wilson Drug Co., on the beautiful new drug store they are opening at 163 North Woodward Ave.

For seven years this firm has served Birming-ham so faithfully and well that they have been compelled to find larger quarters to take care of a constantly growing business.

It was our privilege to secure for them this splendid location on the west side of Woodward, just north of the First State Bank Building, into which they have built the finest and most scientific equipment known to the drug trade.

In this single block, in the past few months, we have negotiated leases running from five to unetty-nine years for the Twin Shoppe - Wilson Drug - Thomas Market - Kreege - Mulholland - Kroger, and A. and P.
