

# EIGHTS ADDED BY CHRYSLER

First 8-Cylinder Cars Are Introduced By Auto Manufacturer

Walter P. Chrysler today announces two lines of straight eight-cylinder motor cars—the first eight-cylinder cars ever to bear the Chrysler name—and the proved products of months of engineering development. In these new cars Chrysler en-

**WE HEARD IT SAID BY—**  
Hartwell Ladd, assistant supervisor, Barnum swimming pool:  
"One of the regrets I have for my high school career is that I dropped out of the Boy Scouts. I would find the Scout training both welcome and useful now."

gineers have directed every effort toward designing a car with the perfect smoothness, roadability, handling, and a total absence of rocking and rolling through lowered center of gravity, continental smartness, exquisite body absor-

ments, synchronization of engine of transmission and of brakes. The two lines have been designated as the Chrysler Eight and the Chrysler Imperial Eight. The former is offered in the Standard Motor Sales in four body styles at a factory price range of \$1,625 to \$2,100. The latter is offered in the convertible coupe; \$1,495 for the standard coupe and \$1,495 for the roadster.

Outstanding mechanical features of both lines include the L-head type of straight eight cylinder with the famous Chrysler Silver Dome cylinder head; the four-valve overhead intake and exhaust downdraft carburetion; automatically controlled radiator shutters; two-way hydraulic shock absorbers; four wheel internal expanding hydraulic brakes, completely enclosed fuel pumps; four-point rubber engine mountings; impulse neutralizers; the bondaric rust proofing process on all unmailed parts and scores of other refinements. Nothing has been overlooked to give the new Chrysler cars more satisfying motor car transportation.

**Designed As Unit**  
One of the remarkable engineering accomplishments has been the development of the chassis and body design as a unit, resulting in a new type of reinforced double drop chassis frame and a welded all-steel body. Perfect correlation produces extreme lowness and increased headroom, with no sacrifice of road clearance.

Long graceful hoods covering the engine compartment narrow at the front and come to a point in a single vertical chromium bar at the center, creating an atmosphere of speed, power and grace. Bullet-shaped chromium headlamps and sweeping air-wing fenders add to the fleet lines of the low frontal area. The lamp tier rod is concealed behind the radiator shutters, adding to the clean-cut front appearance.

Sloping windshields are parallel to the forward slant of the radiator front. Door and window openings on all models are gracefully curved at the top. Wide mixing of colors complementary to the body lacquers starts at the radiator front, crosses the cowl, and encircles the body of the car, tapering down the rear compartment of the coupe models.

**All-Steel Bodies**  
All-steel bodies are introduced on every model of the Chrysler Eight, the first time this type of construction has been offered on cars in this price class. The front end, cowl, sides and rear compartment are one-piece stampings flash welded and fused together to form a single body unit. Annoying squeaks and rattles are eliminated by perfectly fitting doors and windows. Doors are single steel stampings joined together with bridge type of construction. Depressions and ribs stamped in the metal prevent rumbling and drumming.

Convenience and completeness are featured in the driver's compartment with seats adjustable for leg room. The steering column is also adjustable for three driving positions. On the instrument panel, arranged in separate single pieces following air-craft style, are speedometer, electric fuel gauge, ammeter, oil pressure gauge and engine temperature indicator. Below these separate gauges are carburetor choke and manifold heat control buttons. Spark control is entirely automatic. Theft lock ignition switch is above the steering column. The panel is illuminated by two hooded lamps. Gasoline throttle, head light control and horn button are mounted on top of the two-spoke steering wheel. Clutch, brake and foot-size accelerator pedals are covered with rubber to assist in easy operation. The windshield can be raised for ventilation by a control lever. Two windshield wipers are provided. Cowl ventilators on each side are operated by the foot.

### Reckless Driver Pays A \$15 Fine

George Williams, of Williamsburg road, was found guilty of reckless driving Friday afternoon in the court of Justice Floyd S. Buck and sentenced to pay a fine of \$15. Williams was arraigned July 5 on complaint signed by Mrs. Ruth Swayer, after a collision, July 4, on Woodward avenue in front of the Birmingham Savings Bank.

The collision occurred when Williams driving south, swung his car over to the right preparatory to making a U turn, and then turned out in front of Mrs. Swayer's car, which struck his. Both cars were slightly damaged. Williams pleaded not guilty and was released on his personal recognizance to appear for trial July 12. On that date, the trial was postponed to July 18, when Mrs. Swayer and J. D. Ryder testified for the village. Williams was supported in his contentions by Mrs. Williams, his son, George Jr., and by Pringle Gould.

- 10—Wagner did not write Madam Butterfly.

# Eccentricities

By LEO A. DONOVAN

**O**NCE upon a time there was a conscientious constable. He was one of those psychic types.)

His specialty was tossing poor people out of their homes for non-payment of rent. And when he tossed 'em out—they stayed out. He was an accomplished and excellent results that some of the best landlords in town sought his services on more than the few basis.

And so, what with the moving of furniture and the constant employment he grew strong and saved enough money to buy a house of his own. Happy was his wife and their three little children! They enjoyed such luxuries as an electric refrigerator, a radio, a phonograph, an automobile and movies twice a week.

With the passing of the years all progressed splendidly. The constable's wife waxed fat and forty and the constable slept the sleep of the just at night because he had done his work well and had stored his reward in the bank.

One day a young fellow named a husky youth who managed to pass his freshman examinations in college and had starred on the freshman team. That was in the days when college football candidates came with other fellows pitched hay on the farms or obtained employment at wholesale produce markets in the big cities. The hard physical labor made them very strong, of course, and in the fall many colleges boasted more than a score of young men who would make the kindly Village Blacksmith wince when they shook hands with him.

**N**OW THE son was a little more red-headed than his father, and when they went to a home to evict an unfortunate tenant the father threw things from the windows, as often as possible, on the plea that the articles thrown could not be carried through the narrow hallways and out the front door without seriously damaging the landlord's walls, etc.

Perhaps the son was so kind after all. He would plead to bring out the best pieces of furniture and other household furnishings to save his father from strain, but actually because he believed his own muscles would develop more quickly if put under a greater strain. Some say, too, that the young man never threw things out of the doors or windows because he believed the exercises necessary in carrying them to the front lawn would increase his strength, even if the action saved the wear and tear on the tenants' furniture.

Well, the week before the young football candidate was to report for pre-season grid practice, he received a note from the college authorities, informing him that he would have to take an examination in advanced algebra before entering school the next term. He had failed in the subject, he remembered, but his fraternity brothers and college alumni assured him that "it would be all right" and that they certainly needed him for the team next year. "So don't worry."

But the young man did worry.

RE-ELECT

LUTHER D. ALLEN

for

ROAD COMMISSIONER

Republican Candidate

He attempted to "crum" before returning for school. For several nights he burned the midnight oil, but he was so tired from the labors of the day when he assisted his father that he frequently fell asleep with the book open before him.

**T**HEN, one night, it happened. The young man fell asleep over his books. He had begun to dream a great deal after the comparative mental and physical strain and this night his anxiety prompted in him a dream whose strangeness has never since been equalled.

He dreamed that he was awakened by the coach, who told him to forget the worries of the advanced algebra test because everything had been arranged. The coach warned him, however, that he must not neglect his furniture moving because there was another candidate who had not yet missed a day of cleaning locomotive engine boilers, building houses, digging ditches and other works that might make him the strongest candidate for the position the constable's son sought. Then the young man dreamed he went to bed, happy in the thought that the examinations would not bar his athletic career.

The next morning the constable was awakened by the sun streaming

J. B. Howarth, realtor:  
"Just what can be done even in dry weather to keep our lawns beautiful has been demonstrated by the attractive though small strips of bent grass in front of the Detroit-Edison office on South Woodward avenue, a thing of beauty and a joy forever! Careful attention has kept this lawn strikingly green and fresh, restful to the eyes of all observing passers by. And have you noticed the immaculately clean windows of the same building? How much these little things mean in helping to beautify one's locality!"

ing in his face. He blinked a few times from the strong rays, and then buried his face in the pillow. Suddenly, he heard laughter as from hundreds of people! He jumped out of bed in alarm. But instead of landing on the soft rug his labors had purchased, he landed on the cool green grass.

There he was in his own front yard, all of his household effects piled 'round about him and his neighbors roaring with laughter at the sight. Down the street came his wife and their other children returning from their vacation.

On the cool board floor of his empty bedroom slept the tiredest football candidate the world has ever known.

## The Measure of Our Service

If we serve helpfully, comfortingly, satisfactorily... we have gained our greatest remuneration. To serve all appropriately and in a manner suited in every way to their means is a problem that our experience has enabled us to solve. Those who call upon us may always rest assured that our wide range of service will care for their every need and that every attention will be paid to the details that contribute to a dignified and comforting service.

## As COOL as it looks!

Smooth, snow-white surfaces of gleaming porcelain make the ELECTROCHEF Electric Range cool in appearance—and it is as cool as it looks! Double air space insulation keeps the heat inside the oven and assures a cool kitchen. Polished radiant reflectors surrounding the heating elements focus the heat on the cooking utensils, just where it is needed. Little heat can escape into the room. ELECTROCHEF's focused radiant heat means fast, efficient cooking—and cool cooking comfort. No flame, no matches. Simply turn a switch. Especially in summer, electric cooking wins women's lasting gratitude. Now you can cook without fire, without smoke or soot or fumes.

It is EASY TO OWN an ELECTROCHEF!

**\$10** DOWN PAYMENT

puts an ELECTROCHEF in your kitchen—installed, ready to cook. Balance \$6 per month. Cash price installed, \$103 including all necessary wiring.

Sales under these conditions made only to Detroit Edison customers.

Prepare your meals in this pleasant, modern way. Enjoy the cooking luxury this stove brings—at a cooking cost but a fraction more than any other method! See ELECTROCHEF today—at any Detroit Edison Office.
