## a Conquest in Electric Refrigeration

Less parts—more value—is the short story of the Norge conquest. The Norge Rollator (cold making unit or compressor) has no pistons, piston rings, piston rods or other complex parts. It is irresistibly simple—a roller turning in a cylinder—a perfected and exclusive type of rotary—proven for years in world-wide use. Here is simplicity that brings a legitimate economy—big enough for you to see at once—passed on to you in the charming appearance—extra features—and choice craftsmanship of Norge cabinets. So the Norge Refrigerator are sweeping across the field—an army of conquest—bearing standards of higher value and lower price. See them—know them. They are ready for your inspection.
