**COOLIDGE SUGGESTS:**

Here's some most important subject matter, well worth the consideration of all people, agree the religious leaders of the country; it is from the pen of very practical Calvin Coolidge, 1st-president of the United States.

"In every generation the clergy have furnished the spiritual leadership on which has rested both the political and economic progress of the times. They are the main source of the best standard of civilization. Without their influence the nation would fall into a decay of moral and material decay. If not for their sakes, we should give them more appreciation and better support."
