ECCENTRIC WANT ADS GET QUICK RESULTS

Quicker than a wink

Puroil-Ethyl

You can wink your eye in 1-10th of a second. It's about the fastest movement you can make. But it's pretty slow compared to the 5-1000ths of a second your automobile engine allows, at 30 miles an hour, for gasoline in each cylinder to ignite, burn, and start the piston downward. Think of it! Twenty times quicker than a wink, and it must burn completely or you'll be troubled with carbon—it must burn evenly and instantly or you lose power.

It makes a premium grade gasoline, such as Puroil-Ethyl, with surging power refined into it, to give you this full-powered, hair-trigger action your motor requires for maximum performance!

Ethyl fluid in Puroil-Ethyl utilizes all the power of the gasoline by eliminating the "knock." But in Puroil-Ethyl, the gasoline itself is packed full of eager energy.

It ignites instantly, making quick starting a reality. It burns evenly, eliminating vibration. It burns completely, leaving less carbon, and gives greater mileage because all of it is converted into purring power.

Unless the full power of your motor—get out of the power plant all your manufacturer built into it. Fill up today with Puroil-Ethyl and enjoy split-second performance. There is a difference.
