## "Mud And Stars" Recalls War Songs

When we reckon the years since the war—14 of them—it is hardly possible that the songs we sang in those days are little known by the young people growing up today.

Was it nearly 15 years ago that we thrilled to the strains of George Cohan's "Over There" when, the band played for the men bound for the western front as they marched to the railway station? How those songs come back like familiar faces forgotten for the while—"Tippityto"—"Keep the Home Fires Burning"—"I'll Meet You Again"—"Smiles"! They are to be met again where acquaintance can be renewed in an anthology of war songs and poetry under the title of "Mud and Stars" by Dorothea York of Yorkplace, Miss York is well known in Birmingham as a member of the Thursday Musical. "Mud and Stars" is just of the press and is making its debut appropriately this week during the American Legion Convention.

## "Why My Next Car will be a FORD"

WHEN you buy a Ford there are two things you never have to worry about. One is reliability. The other is long life.

Here's an interesting letter from a Ford owner in North Carolina:

"My Ford was purchased May 8, 1925, and has been run 121,767 miles. It has never stopped on the road for repairs of any kind whatsoever except punctures.

"The brakes were relined at 101,000 miles. My gas mileage averaged 21 miles to the gallon, and on tires, 19,000 miles per tire. I travel over all kinds of road conditions—mountainous and flat.

"I consider this a wonderful record and I assure you my next one will also be a Ford."

This is just one of many tributes to the reliability and long life of the Ford. A Ford owner in Iowa tells of driving his Ford 73,000 miles in a single year. Another writes of 120,000 miles of good service.

Think ahead when you are considering the purchase of an automobile and consider what it will be like after thousands of miles of driving. Will you still be satisfied? Will you still say "it's a great car?"

If it's a Ford, you know everything will be O. K. It will be taking you there and back in good style, just as it has always done. And you will have saved many important, worthwhile dollars in cost of operation and up-keep and low yearly depreciation.
