TELEPHONE BRINGS AID TO INJURED CHILD

[An incident which happened to a family in Michigan]

The small daughter of a Michigan family, playing in the basement of her home, was painfully and critically injured.

Her mother, hearing the child's screams, and seeing what had happened, dashed frantically to the telephone and called the doctor. The physician arrived without delay, and through immediate and skillful medical attention, was able to treat the child's injuries successfully and prevent serious complications.

In such emergencies, just one telephone call for assistance may be worth more than the cost of the service for a lifetime.
