i A Royal Democrat

Of all the loyal Michigan Democrats who have come under our defloraid observation, we can think of no one who has been more steaffast to the principles of the Jeffersonian Parry than Harry M. Royal, publisher of the Oceana Herald, pittifished at shelby. Week after week, year after year, his newapper has been pleusing the cause of Democracy. In his personal column, "Random Remarks," Mr. Royal has carried or a high type of intelligent political party-instability, with an nocasional friendly word for those of the Republican faith—and he lish takes advantage of opportunities to send a litter of acceptable chiding to brother editors.

The Ecentric recently was the target for one of Mr. Royal's darts, which we herewith present:
Most people who have been in contact with the drift of popular sentiment during the past few months had already appraised the presidential election result. If has been only within retent week that the possibility of a landshidge to include rock-ribbed Michigan has been thought possible. We go back forty-two years for such a result on the state ticket and eighty years for a similar result for Precident.

After getting from our good friend C. D. McNanee, of the Muskepon Chronick, that this latter thing had happened we were prompted to wonder just what it was that the towardy Michigan editors, who created a national furore by going to Washington for an interview with the President a few weeks ago, had said to him. We thought at the time that carrying to him that Michigan bet was 1 bit suggestive and, possibly, significant. And now we are of the opinion that they thus gently and ingeniously tipped aim off as to what he would get in Michigan.

We ave been thinking about that trip—to which we were not invited—and wondering if we might not duplicate it along in the spring or sometime.

We suggest, on the other hand, to Mr. Royal, (should his rerange a trip to interview President-Elect Hourself Both that the would get in Michigan a glepitural or forcet products to the White group t
