P. T. A. Supplies Barnum Pupils With 9,000 Bottles Of Milk During Year

More than 9,000 bottles of milk were served to children attending the Barnum School during the past year, Mrs. Thomas R. Navin, chairman of the milk fund, reported at the annual meeting of the Barnum Parent-Teacher Association Thursday afternoon.

As a large portion of the milk was furnished gratis, Mrs. Navin said, \$415 was drawn from the fund to cover this cost, leaving a balance of \$2,825.

The meeting, which covered the year's activities, was marked by the installation of new officers. Mrs. E. W. Osborne succeeded Mrs. Arthur C. Peck as president. Mrs. Charles E. Flustead, acting for the officers and executive committee.

At that, the Big League boys might learn something. It would be a good deal to find the ideal, Congressionally approved, bloodless and painless method of having the last word in an argument with "tampies."

Such questions arise naturally when only a Congressman could answer: The correct use of the filibuster in baseball. How to convince an umpire, Parliamentary procedure on the baseball diamond. In what manner does Republican differ from Democratic baseball.

At any rate, this game was a historic episode. It seems to be the first time in record that one party could "play ball" with the other.

And, of course, as far as we were concerned, it's just another piece of political clowning. And as for official or unofficial "protectors," Congress doesn't have to play baseball to find them.

Marjorie E. Porter Celebrated With Luncheon For Members of the Royal Family

The British young Zoro Agha, 15-year-old resident of Lott 12 Turkey, who has been married 12 times and is now on furlough in England, has just sent word to Mrs. Agha No. 12 that he likes England and intends to spend another year there.

And the girl he left behind him, his junior by about 70 years, is no longer a sign of sophistication and prosperity. Over in Bilbao, Spain, fishermen on the Bay of Biscay report over-production in the anchovy industry, and are giving them away to feed the thousands of unemployed.

News comes from Edinburgh, Scotland, that Firemaster McIlvench has recommended aerial equipment for the fire department, believing that firemen of the future will fight fires from the air.

Which seems to clinch the argument that it must be a cheaper method.

Boys will be boys and Congressmen will be Congressmen, even on the baseball diamond.

When the Democratic and Republican baseball teams, composed of members of the House of Representatives, met at Griffith Stadium in Washington, Saturday, each team crept along its official "protectors," arguing with the umpires when their decisions were questioned.

This is certainly placing the national sport on the same plane with national politics. The only difference is that baseball is a fairly clean sport, that is, it has been up to this time.

Piano Students Will Give Program Saturday

A number of Birmingham children studying the piano with Miss Mildred Green will take part in a recital in the auditorium of Baldwin Public Library, Saturday, 2:30 P. M.

Those who will be presented include Constance and Marjorie Peck, Patty and Phyllis Allen, Ruth Minis, Esther Jones, Lillian Taylor, Merlyn Thompson, Barbara Phillips, Helen Dennis, Betty Steverston, Dorothy Mundy, Mary Grace Ogden, Bobby Slaker, Jack Birthing, Dorothea Staebler, Franklin Phillips, Marjorie Tate and Phyllis Huston.

Francis Allen, a pupil of Miss Helen Allen of the Detroit Institute of Musical Art, will assist with a group of violin solos. Invitation is extended to the public to attend.

Mr. and Mrs. Cassius Carter of George street had as their guest over the week-end, Miss Maurine King of Lansing and their son, Morgan, both of whom are students at Michigan State College.

Hokinson, both regular contributors to the New Yorker; Grover Page of the Louisville Courier-Journal; Harry Keys of the Columbus Dispatch; and many others.

Miss Phillips can reach the same heights. Being Strait was first discovered and exploited by a Caspian named Deshires; in 1648, Being Strait amounted to only slightly more than half of the total.

Four years ago open cockpit planes were most numerous among models licensed. However, during the past four years, open designs accounted for only slightly more than half of the total.

Uruguay is the smallest country with the densest population. The pace of a loaded camel is steady and uniform, but slow—approximately 2 1/2 miles per hour.
