A LETTER FOR YOU

Dear friend,

If you could have been here Saturday you would have thought Hizonor D. Frisbon had gone away for the week-end. Believe it or not, the letter for you was conducted by the League of St. James' Women was a huge success from the standpoint of the dollar and a "pleasant time was had by all" and "how would it be?"

You would have been amazed at the way the youngsters crowded around Karen Rickerson when she gave her ventriloquist performance in the afternoon. Mr. Frisbon simply mobbed him, and crowded around him so closely that I didn't see how he could give his program. But he didn't seem to mind it, and went right on. He's really clever at it, and goes over with all the pet parade lapped nothing as far as his pets were concerned.

ELECTROCHEF keeps POTS and PANS spick and span, too!

WHEN I first bought my new Electrochef electric range, my friends couldn't believe that it was possible to cook without blackening utensils, as on a flame-type stove. They were amazed when I showed them an aluminum saucepan almost as bright and shiny as when it was new. I had been using it on my Electrochef for months.

The reason is simple. Pots and pans stay bright and sparkling because electric heat is CLEAN—as clean as sunlight.

There is no smoke or soot, nothing but pure heat from a glowing wire. For the same reason my kitchen walls and curtains stay fresh much longer. They do not require nearly so frequent cleaning. And one of the best things of all about my Electrochef is its COOL cooking. No matter how much I use the range, it never overheats the kitchen.
